and › decisive › action ›

The attention of politicians, companies, and the general public has turned to the issue of energy security in the wake of the military invasion of Ukraine and the profound energy crisis that struck Europe in 2022. Ensuring sufficient, clean, reliable, and affordable energy is a fundamental challenge. One of the solutions is the massive development of renewable energy sources, which is what we have focused on at ČEZ Distribuce, a. s.

We have set up a transparent process for connecting renewables, accelerated digitization and automatic processing of certain types of applications, invested CZK 15 billion in the distribution grid, and deployed new technologies across all areas.

As part of our long-term strategy, we are focusing on decentralization of the energy sector, massive development of renewables, and digitization. We want to continue improving our services in all areas, operating the distribution grid safely and reliably.

We › have ›
taken › a › number ›
of › steps › now; ›
the › others › follow ›

We support energy savings
and energy security in Europe

We connect renewable
energy sources

We invest in development and
modernization of the distribution grid

The world of energy
is changing and so are we

We continue to digitize
and improve our services

We accelerated the renewal
of electricity supply and made
significant progress in managing
the distribution grid

We contribute
to energy security

We prepare the distribution grid
for dynamic development of renewables

We prepare for an emission-free
future and support the transition
to electromobility

We focus on technological
development of energy storage

We are experiencing a decentralization of the energy sector, witnessing a massive development of renewables and electromobility, we are phasing out gas and exploring the possibilities of electricity sharing. This brings new challenges, investments in new technologies, deployment of modern and smart solutions, increased digitization, and automation. These are all just parts of the comprehensive transformation launched at the end of 2022 under the new Horizon D transformation project.

Introduction by the Chairman of the Board of Directors

Ladies and Gentlemen,

The year 2022 was a pivotal one for ČEZ Distribuce in many ways. The uncertainty caused by the war conflict in Ukraine also affected the energy sector. It showed how important our work is and how crucial it is to be able to react flexibly to changes.

We have started to transform our Company in order to prepare ČEZ Distribuce for the new challenges that the changing world of energy is posing. We need to prepare for what will happen tomorrow, a year from now and twenty years into the future. To have the energy to see beyond the horizon. And that is the purpose of the transformation of ČEZ Distribuce, which we call Horizon D.

We are focusing on four main areas:

We want our customers to perceive us as a modern, fast, and high-quality service provider, and to make communication with us clear and friendly. We strive to ensure that our operational and financial results are comparable to the best in the European market. We continue to implement key network digitization projects and smart metering deployments. These projects are also essential in view of the societal demand for clean energy.

By 2025, we want to significantly reduce customer connection times and convert maximum contacts to digital channels. We will focus on improving process efficiency and strengthening key competencies in the field of smart grid, IT, and digital skills needed to use new technologies.

Important milestones related to the transformation include launching the Proud mobile app. This enables customers to handle their affairs with us conveniently using their mobile phones, as they are used to with other service providers. And customer care has become much easier and more efficient for us.

Another success in the field of transformation is the establishment of the D2 Digital and Data Center, which has become a key unit for digital transformation and a central hub for experts in the fields of data science and robotics.

In 2022, we also worked hard to further develop renewable energy in Czechia. We are preparing measures that will enable more RES to be connected using inverter functions in conjunction with smart metering. At the same time, we are starting to implement the reinforcement of weak parts of the grid where the gradual phase-out from gas heating towards heat pumps will have the greatest impact.

In the Energy Asset Management Section, we have undertaken a structural change in our asset management system to better manage, maintain, and develop our distribution grid. Investments in the distribution grid reached CZK 14.6 billion in 2022. Given the massive increase in the demand for connecting generating plants and microgenerators, we have shifted a significant part of our investment funds from the renewal of the existing distribution grid to the development part.

Economically, last year was extremely successful. We were able to meet our economic targets and performance indicators. EBITDA reached CZK 16.9 billion and net income was CZK 6.3 billion. In total, we invested CZK 15 billion, which is CZK 1.8 billion more than in the previous year. The largest part of the investments (CZK 12.4 billion) was directed towards high-voltage and low-voltage construction.

In the area of Customer Service, we focused on digitization and further improvement of services to be able to handle customer requests even faster and more efficiently. We launched a robotic system to automatically process simple connection requests. We created the aforementioned Proud mobile app, as well as the virtual assistant EMA to help Contact Center operators handle common customer requests.

At the same time, we had to deal with the repercussions of the electricity supplier collapse at the end of 2021 and attend to more than 10,000 customers together with the supplier of last resort. In 2022, we handled more than 70,000 requests in Customer Service to connect generating facilities, including over 56,000 to connect microgenerators. We successfully managed an increase of more than 333% and I very much appreciate the strong commitment of all colleagues involved.

In the Grid Operations and Management Section, we experienced 10 distribution grid emergencies last year, caused by weather conditions. The greatest damage and extent of electricity supply limitations was caused by the passage of the Dudley pressure low in February, which cumulatively caused more than 2,500 outages with over 278,000 homes affected. Thanks to innovations that help us pinpoint the location of the fault and efficiently direct fault crews to it, as well as the maximum commitment of our people, we were able to reduce distribution reliability indicators to historic lows (SAIFI below 1.9 interruptions/year and SAIDI below 208 min/year). For this result, we will receive a bonus of more than CZK 114 million from the Energy Regulatory Authority in 2022.

Our employees were still our greatest asset in 2022. We care about their satisfaction, which is why we regularly conduct employee surveys and revise the Company's corporate culture accordingly. We have actively involved our employees in the changes as part of our talent program. At the same time, we also address the issue of generational change and succession. One of the means is the Prokop Diviš Motivation Program, under which we present ČEZ Distribuce as a modern, digital company and a leader in its field. More than 1,500 students joined the program last year, and they may become our new colleagues in the future.

We have begun work on a new development and training concept for 2024 that will facilitate employees' access to personal and career development. The new concept includes, for example, an internal mentor program that offers the opportunity to actively engage in supporting and motivating new colleagues. An individual approach and support for the development of our employees remains a priority for us.

Last year, we defended our Safe Company title once again and proved our dedication to occupational health and safety, fire protection, and environmental protection. In the environmental field, we have also met the requirements of the ISO 14001 "Environmental Management System" and ISO 50001 "Energy Management System" standards in 2022.

Finally, let me thank all our business partners for their mutual cooperation, our customers for their goodwill, and our employees for a job well done and for meeting our targets.

I wish everyone good health and plenty of energy.

Ing. Martin Zmelík, MBA

Chairman of the Board of Directors
and Chief Executive Officer, ČEZ Distribuce, a. s.

Key Events of 2022 and 2023 until the Annual Report Closing Date

Key Events of 2022

January

- On January 29–30, 2022, the fault rate of the distribution grid was negatively affected by the storm Nadia, which gradually affected most of the distribution area, most of all the North, Center, and East regions, almost 46,000 customers were restricted, and 93 faults were registered on high-voltage equipment; the most frequent type of faults were falls of trees and branches onto the lines, and damage to insulators and conductors.
- The reconstruction of the 110/35 kV Červený Kostelec transformer station was started in the East region; the existing 110 kV substation will be replaced by a new substation of the same type with roofing of transformer and choke stations; the original outdoor 35 kV substation will be replaced by a new encapsulated switchboard.

February

- On February 17, 2022, the distribution grid was adversely affected by an emergency due to strong winds, reaching hurricane speeds in places, associated with the passage of the Dudley pressure low; the West, North, Center, and East regions were the most impacted, with 287 faults recorded in the peak hour, interrupting electricity supply to nearly 278,000 customers at one point; cumulatively, there were more than 2,500 fault events associated with interruptions in electricity distribution; additional waves of strong winds in the following days (Eunice and Antonia) significantly affected the fault rate and complicated the repair of equipment until February 22, 2022; the most common type of faults were trees and branches falling onto the lines and damaged insulators and conductors; in many cases repairs had to be postponed for the safety of internal and external company staff.
- In the East region, the construction of a new double 110 kV line in the Polička—Svitavy section has been started; the line is being implemented in connection with the construction of the 110/35 kV Polička transformer station and the construction of the 110 kV Hlinsko—Polička line; in the case of wind farms in the Polička and Svitavy area, it will serve for the possible output of wind power plants against the Mírovka node.
- In the Moravia region, a comprehensive reconstruction of the Šumperk—Ráječek high-voltage line has been started; the reconstruction will guarantee an increase in the reserve transmission capacity to meet future power requirements.

- In the Moravia region, a comprehensive reconstruction of the high-voltage Lískovec—Frýdlant nad Ostravicí line was started with an increase in the cross-section of the conductors and the installation of a combined 48-fiber ground cable.

March

- The Robotization 2 project was completed, thanks to which a significant part of the distribution grid construction process was digitized.
- In the North region, the reconstruction of the 110/22 kV substation at the Chomutov South transformer station was started; the 110 kV substation will be equipped with two busbar systems and new outdoor technology, and a new transformer will be installed in the new stand; the 22 kV substation will be equipped with new indoor technology and new control and protection.

April

- On April 1, 2022, a new Digital & Data Center Unit was created as a key hub for digital transformation with the aim of centralizing technology knowledge and skills, effective management, and service delivery to all process areas of the Company.
- As at April 1, 2022, an organizational change was made in the Energy Asset Management and Customer Service sections to streamline the organization of work, clarify competencies, and straighten out E2E processes in the areas of Customer Service and Energy Asset Management; the change was aimed at incorporating the first outputs of the Digitization of Service and Transformation of Asset Management programs.
- On April 9, 2022, due to wet heavy snow causing trees and branches to fall onto power lines, the West region experienced increased outages, with nearly 13,000 customers affected and 28 unplanned power outages recorded.
- As at April 12, 2022, there were 5,449 customers registered with the supplier of last resort in the distribution territory of ČEZ Distribuce, and the first SLR of the first customers was terminated as at April 14, 2022.

May

- The electricity supply outage was the subject of a joint exercise between ČEZ Distribuce and ČEPS, which took place on May 9, 2022; it tested the availability, response, and synergy of dispatching and crisis staff in the given situation; the fire rescue brigade also took an active part in the exercise.
- The advent of RES support and the impact of increasing energy prices has triggered a massive increase in the number of requests for connecting photovoltaic plants; in order to manage the technical processing of connection requests and induced investments, the priorities in asset management have been changed, with priority given to induced investments and investments to support the connection of RES, especially to the MV and HV levels.
- On May 20–21, 2022, due to strong wind and its consequences, there was an increased failure rate of the distribution grid equipment, with 131 failures recorded, affecting more than 158,000 customers; during the night, supply to almost 90% of customers was restored and most of the failures were eliminated within 24 hours of the interruption.
- A significant milestone in the European OneNet project led by ČEZ Distribuce was the launch of the so-called network semaphore; this is a tool developed to indicate the availability of the distribution grid to providers of power balance (flexibility) services.
- The guarding of a large substation was practiced as part of the Safeguard exercise, which took place on May 20–23, 2022 in Přeštice with the participation of 54 soldiers.
- By signing a cooperation agreement, the Secondary Vocational School of Electrical Engineering in Plzeň and ČEZ Distribuce launched a dual education project, the aim of which is to link theoretical teaching with practice, to stimulate students' interest in the energy industry, and to ensure a young generation of future employees.

June

- On June 20–21, 2022, due to an atmospheric storm accompanied by strong winds, there was an increased failure rate of distribution grid equipment in the Center and East regions, with 33 failures recorded, affecting more than 76,000 customers; most of the failures were resolved within 24 hours of the interruption.
- On June 28–July 2, 2022, due to the passage of several atmospheric storms accompanied by strong winds, there was an increased failure rate of distribution grid equipment in the Moravia, North, Center, and East regions, when 21 faults were recorded with a disruption of more than 26,000 customers; fault recovery was complicated by prolonged adverse weather conditions.
- The evaluation of the 6th year of the Prokop Diviš Motivational Program at individual partner schools was completed; 1,527 students from 10 schools participated in the program and 91 of them were awarded; the program aims to raise interest and awareness of ČEZ Distribuce and motivate students to acquire further knowledge in the field of electricity.

- In the Moravia region, the construction of a new unmanned transformer station was completed in Uničov in the Olomouc region, which will improve the reliability of electricity supply for the entire region and cover the increasing consumption of industrial companies as well as the requirements of developers planning to build new houses in the town; at the same time, it will provide sufficient power for the electrification of the Olomouc–Uničov–Šumperk railway line.

July

- On July 14, 2022, due to an atmospheric storm accompanied by strong winds, there was an increased failure rate of distribution grid equipment in the Center region; more than 23,000 customers were affected and 18 failures were recorded; fault recovery was complicated by adverse weather conditions and a degree of local damage, with lines down in several locations over multiple ranges.
- As at July 22, 2022, electronic dispatch and contracting was enabled for bulk service customers, while a new transparent process was created for connection requests through the Distribution Portal or web application without registration.
- ČEZ Distribuce launched the Proud mobile app, which is a significant milestone in the Company's digitization process; the app enables customers to deal with issues related to electricity distribution; they can find the consumption history at service points, perform electricity self-reading, and submit online requests; the app informs about planned outages and faults at the customer's service points by means of notifications; the app is primarily intended to facilitate customers' communication with the Company and is available for download on Google Play and the AppStore.

August

- On August 5–6, 2022, due to strong winds, there was an increased failure rate of distribution grid equipment in the Center region, with more than 15,000 customers affected at the peak of the failure rate; fault recovery was complicated by adverse weather conditions and the level of local damage; during the storm, a local downburst resulted in the destruction of poles and the fall of 110 kV lines onto the D1 motorway near the village of Všechnomy.
- On August 26–27, 2022, due to strong winds, there was an increased failure rate of the distribution grid equipment in the North region, with more than 14,000 customers affected at the peak of the failure rate; fault recovery was complicated by adverse weather conditions and the extent of local damage.
- In the West region, a complete renovation of the existing 22 kV substation at the Rokycany transformer station was completed, including the control system and self-consumption.

September

- On September 29, 2022, the Board of Directors of ČEZ Distribuce, a. s., debated a letter of resignation received from Mr. Petr Žejdlík and, at his request, approved the termination of his service as member of the Board of Directors with effect from September 30, 2022.

October

- The new virtual assistant EMA was launched to help the Contact Center operators with handling common customer requests, guiding the customer on the ČEZ Distribuce toll-free customer care line from the beginning of the call, where it first identifies the type of request and then solves it itself or connects the customer to the operator; for the time being, it can deal with unsealing and resealing requests and gradually learns other topics; EMA can handle up to 100 customers simultaneously and should handle about 15% of all voice requests.
- On October 17, 2022, the Return exercise was held, aimed at dealing with emergency operational conditions in the Czech electricity grid in accordance with the new European legislation, which was carried out by ČEPS in cooperation with ancillary service providers and distribution system operators, including ČEZ Distribuce; the aim of this exercise was to unify the understanding of possible operational states in the electricity grid with a focus on emergency and non-emergency states, to present emergency response procedures, and to verify their completeness, clarity, and feasibility.
- The tenth series of workshops for electricity traders was held, with four topics covered, namely the process of connecting generating plants and microgenerators, the introduction of innovations in the Distribution Portal and digital communication, the mutual exchange of experiences in dealing with customer requests within the framework of set processes and service systems, and the newly emerging area of Community Energy; a total of 112 participants of 55 traders attended these workshops.

November

- In the Center region, the HV line in the section of Kladno–Dřívň–Praha Sever was renewed. The renewal increased the cross-section of the conductors and added optical infrastructure.
- In the Moravia region, the renewal of the overhead line in the section Lískovec–Frýdlant nad Ostravicí was carried out, where the cross-section of the conductors was increased and the optical infrastructure was supplemented.
- ČEZ Distribuce installers and the staff of the Czech Switzerland National Park near Rybníště installed a nesting lining on a 35 kV very high voltage lattice mast in an artificial nest for the rare osprey; this nest is the only one in Czechia and the osprey could return to the country to nest again after more than 100 years.
- In November, a record 4,855 applications were received for the first parallel connection of a microgenerator of up to 10 kW, an increase of almost six times compared to January 2022.

December

- The virtual assistant EMA has learned other new things at the end of the year: it can handle queries about faults, planned outages and HDO switching times (low tariff), while EMA has moved to a website environment where it can respond to the same topics as the chat assistant.
- During December, three electricity traders ceased operations and 282 service points were transferred to the supplier of last resort (SLR).
- In the Center region, a comprehensive reconstruction of the 110 and 22 kV technology was completed at the Příbram–Brod substation, along with new transformer and reactor installations and a new protection and security system.
- In the Center region, the transformation to 22 kV voltage level was completed at the Pečky substation to ensure the network quality in Pečky, Sadská, and part of Nymburk.
- In the Moravia region, the construction of a new transformer station in Dolní Benešov was completed; the encapsulated 110 and 22 kV technology was built together with two transformers and reactors and a new protection and security system.

Key Events of 2023 until the Annual Report Closing Date

January

- Partial renovation of the Strančice substation was started in the Center region; a new 22 kV substation building will be built, including the installation of a new protection and self-consumption system.
- By decision of the sole shareholder of January 13, 2023, Mr. Jakub Hlavica was elected as a member of the Board of Directors of ČEZ Distribuce, a. s., with effect from April 1, 2023.
- In the East region, the renovation of the Havlíčkův Brod transformer station was started; the complete 110 kV HV technology, transformers, 22 kV MV technology, including the protection system and self-consumption will be replaced.

February

- On February 3–5, 2023, the Pit pressure low transition caused increased faults in the distribution grid; 148 faults were recorded with more than 87,000 customers affected; the Contact Center recorded a total of 9,992 calls and the Bezšťávy portal registered 41,785 accesses; the most common cause of the fault was trees and branches falling onto the lines.

March

- On March 10 and 11, 2023, a passing pressure low caused increased faults in the distribution grid, nearly 15,000 customers were affected and 26 faults were recorded on medium-voltage equipment; the most common type of faults were trees and branches falling onto the lines.

We continue to digitize and improve our services

We want our customers to perceive us as a modern, fast, and high-quality service provider, which is why we focus on shortening the time frame for processing and implementing customer requests. We strongly believe that digitization is the way forward. In 2022, we launched a robot to automatically process simple connection request types. We have developed the Proud mobile app for customers, and we have included the new virtual assistant called EMA in the Contact Center for communication.

Governance Bodies

In accordance with applicable legislation and the bylaws of ČEZ Distribuce, a. s., the shareholders' meeting elects and removes members of the Board of Directors, two-thirds of Supervisory Board members, and members of the Personnel Committee. Employees elect one-third of Supervisory Board members from among Company employees.

Supervisory Board

The Supervisory Board is the Company's supervisory body; it supervises the exercise of the Board of Directors' powers and the conduct of the Company's business activities. Details of the Supervisory Board's sessions, approval procedure, meetings, and decision making are specified by the Rules of Procedure in accordance with the bylaws.

Supervisory Board Members as at the Annual Report Publication Date

Daniel Beneš (born 1970)

Chairman of the Supervisory Board since July 1, 2021

Member of the Supervisory Board since July 1, 2021

A graduate of the Technical University of Ostrava, Faculty of Mechanical Engineering, Brno International Business School, Nottingham Trent University (MBA).

He currently holds the position of Chief Executive Officer and Chairman of the Board of Directors of ČEZ, a. s.

Pavel Cyrani (born 1976)

Vice-Chairman of the Supervisory Board since July 1, 2021

Member of the Supervisory Board since July 1, 2021

A graduate of the University of Economics, Prague, majoring in international trade, and the Kellogg School of Management in Evanston, Illinois (USA), where he was awarded an MBA in Finance.

He currently holds the position of Director of the Sales and Strategy Division and Vice-Chairman of the Board of Directors of ČEZ, a. s.

Jan Brožík (born 1972)

Member of the Supervisory Board since December 1, 2018

A graduate of the Faculty of Finance and Accounting, University of Economics, Prague; MBA from the University of Pittsburgh.

He currently holds the position of Director of Financing at ČEZ, a. s.

Marek Šlégl (born 1977)

Member of the Supervisory Board since April 1, 2020

A graduate of the Faculty of Law, University of West Bohemia, Plzeň.

He currently holds the position of Director of Ownership Interest Administration at ČEZ, a. s.

Karel Čech (born 1958)

Member of the Supervisory Board elected from candidates elected by employees since September 1, 2018

A graduate of an industrial school of electrical engineering.

He works as Head of MV/LV Construction East under the Energy Asset Management section of ČEZ Distribuce, a. s.

Václav Rašner (born 1966)

Member of the Supervisory Board elected from candidates elected by employees since September 1, 2018

A graduate of a power engineering program at the Technical University of Ostrava.

He works as a Technical Support Specialist in the Energy Asset Management section of ČEZ Distribuce, a. s.

Board of Directors

The Board of Directors is the Company's statutory governing body, which manages its activities and acts on its behalf. Board of Directors members are elected and removed by the shareholders' meeting. The powers of the Board of Directors are defined by the Company's bylaws approved by the shareholders' meeting. The Board of Directors makes decisions on all Company matters unless they are reserved for another company body by law or the Company's bylaws. Details of the Board of Directors' sessions, approval procedure, meetings and decision making are specified by the Rules of Procedure of the Board of Directors of ČEZ Distribuce, a. s. The Board of Directors has five members; Board of Directors members elect and remove their chairperson and vice-chairperson. Pursuant to law and the Company's bylaws, the Supervisory Board is notified of selected matters or asked for an opinion or prior authorization of the Board of Directors' decision.

Board of Directors Members as at the Annual Report Publication Date

Martin Zmelík (born 1975)

Chairman of the Board of Directors since August 1, 2018
A graduate of the Faculty of Business Administration, University of Economics, Prague; MBA from U.S. Business School in Prague (Rochester Institute of Technology).

Radim Černý (born 1974)

Vice-Chairman of the Board of Directors since February 8, 2019
A graduate of the Faculty of Electrical Engineering, University of West Bohemia, Plzeň.
He is a member of the Board of Trustees of the Czech Association of Regulated Power Supply Companies (CARPSC).

Martin Molinger (born 1985)

Member of the Board of Directors since January 1, 2020
A graduate of the Faculty of Informatics and Management, University of Hradec Králové.

Lucie Masopustová (born 1973)

Member of the Board of Directors since October 1, 2021
She holds an MBA degree from Nottingham Trent University in Prague.

Jakub Hlavica (born 1976)

Member of the Board of Directors since April 1, 2023
A graduate of Brno University of Technology, Faculty of Business, he holds an MBA degree from Wirtschaftsuniversität Wien.

Board of Directors Members Whose Membership Terminated in 2022 or by the Annual Report Closing Date

Petr Žejdlík (born 1974)

Member of the Board of Directors from June 15, 2021 until September 30, 2022

Principles of Remuneration of Members of the Board of Directors and Supervisory Board

The principles of remuneration of members of the Board of Directors and the Supervisory Board are governed by rules approved by the Company's shareholders' meeting and incorporated in service contracts with members of the Board of Directors and the Supervisory Board, as approved by a decision of the sole shareholder exercising the powers of the shareholders' meeting.

Specific tasks for individual Board of Directors members are also approved by a decision of the sole shareholder exercising the powers of the shareholders' meeting, as is the assessment of their fulfillment, which, in accordance with the rules of unbundling, is solely dependent on the Company's performance. Such specific tasks are evaluated annually. ČEZ Distribuce, a. s., did not grant any credit or loans to members of the Board of Directors or the Supervisory Board and did not assume any liability or guaranty or performance on their behalf in 2022.

We connect renewable energy sources

In 2022, we received 70,000 applications for the connection of renewable energy sources. This is a 333% increase year-on-year. Approximately 80% of the applications were for microgenerators, i.e. a generating facility of up to 10 kW connected at the LV level. During the year, 21,000 generating facilities with an installed capacity of 188 MW were connected to the grid. At the end of the year, a total of 55,450 generating facilities with an installed capacity of 6.75 GW were connected to the grid.

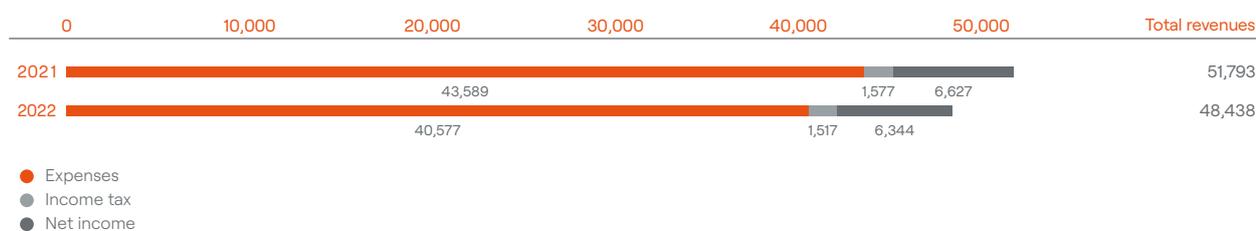

Financial Performance

The joint-stock company ČEZ Distribuce was formed under the Draft Terms of Domestic Merger by the Formation of a New Company with the merger record date of January 1, 2010, and came into existence by registration in the Commercial Register kept by the Regional Court in Ústí nad Labem, Section B, File 2145, on October 1, 2010. Its core business is providing electricity distribution system services to individuals and legal entities.

Revenues, Expenses, and Income

Income Structure (CZK Millions)

The Company's 2022 income before taxes was CZK 7,861 million. Its net income of CZK 6,344 million represents a decrease of CZK 283 million as compared to 2021.

Operating income was CZK 8,226 million, which is CZK 719 million less than in 2021, primarily due to decreased operating revenues. Financing activities generated a loss of CZK 365 million due to interest on borrowings; the loss decreased by CZK 376 million as compared to 2021.

Total expenses without income tax were CZK 40,577 million in 2022. The highest amounts were expended on covering costs associated with support for renewable electricity, on purchasing system, transmission, and distribution services, and on purchasing electric power to cover losses, totaling CZK 21,698 million, followed by depreciation and amortization of noncurrent assets of CZK 8,759 million, personal expenses on production-related consumption of CZK 5,234 million, other expenses of CZK 4,484 million, financial expenses of CZK 1,283 million, and other operating expenses of CZK -881 million.

Total 2022 revenues amounted to CZK 48,438 million and consisted of revenue from distribution system services amounting to CZK 45,682 million, other revenues of an operating nature amounting to CZK 1,838 million, and financial revenue amounting to CZK 918 million.

Asset and Capital Structure

Total Assets

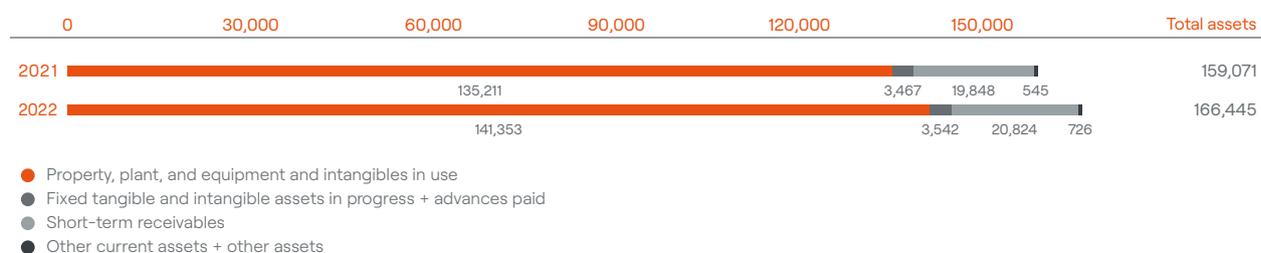

Total assets amounted to CZK 166,445 million, increasing by CZK 7,374 million against 2021.

Fixed assets amounted to CZK 144,895 million, increasing by CZK 6,217 million as compared to 2021. The most significant item was structures amounting to CZK 110,015 million, followed by tangible movable assets and sets thereof amounting to CZK 29,573 million, tangible fixed assets in progress amounting to CZK 3,363 million, land amounting to CZK 1,052 million, and intangible fixed assets amounting to CZK 760 million.

Current assets in 2022 increased CZK 1,134 million on the year before, amounting to CZK 21,464 million. The highest amounts were contingencies amounting to CZK 10,580 million, which represent mostly unbilled deliveries of services relating to electricity distribution, short-term receivables from Group companies within Group cash pooling amounting to CZK 7,714 million, short-term trade receivables amounting to CZK 1,376 million, short-term advances paid amounting to CZK 985 million, and materials amounting to CZK 624 million.

Accruals amounted to CZK 86 million and increased by CZK 23 million against 2021.

Structure of Assets (CZK Millions)

Equity and Liabilities

Equity amounted to CZK 94,793 million, increasing by CZK 2,409 million as compared to 2021. The highest items of equity were the stated capital registered in the Commercial Register, amounting to CZK 60,000 million, the profit of previous years in the amount of CZK 16,155 million, the reserve fund of CZK 12,000 million, and the current period's profit of CZK 6,344 million.

Provisions and liabilities amounted to CZK 60,919 million, increasing by CZK 3,873 million year-on-year. The highest amounts consisted of noncurrent liabilities—controlled or controlling entity in the amount of CZK 27,104 million, deferred tax liabilities in the amount of CZK 12,030 million, short-term received advances in the amount of CZK 11,436 million, short-term trade payables in the amount of CZK 3,184 million, short-term liabilities—controlled or controlling person of CZK 2,443 million, short contingent liabilities of CZK 2,132 million, and other provisions of CZK 1,966 million.

Other liabilities, consisting primarily of deferred revenue from connection applicants' contributions, amounted to CZK 10,733 million, increasing by CZK 1,092 million over the previous period.

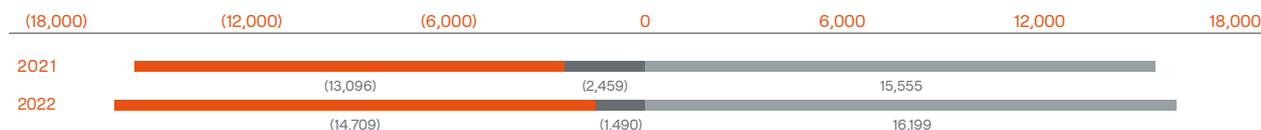

Structure of Equity and Liabilities (CZK Millions)

Company Financing

Cash Flows

Cash Flow Summary (CZK Millions)

- Investing activities
- Financing activities
- Operating activities

Cash from operating activities, amounting to CZK 16,199 million, was generated by the following:

Profit on ordinary activities before taxes	7,861
Corporate income tax paid	(1,372)
Depreciation and amortization of fixed assets, write-offs	8,779
Changes in working capital	(113)
Other operating activities	1,044

Cash used in investing activities totaled CZK 14,709 million, with expenditures on purchases of fixed assets of CZK 14,813 million accounting for the greatest part thereof.

Cash used in financing activities totaled CZK 1,490 million; the amount included the payment of dividends amounting to CZK 3,935 million, change in cash under Group cash pooling of CZK 617 million, and change in the balance of loans of CZK -3,062 million.

Borrowings and Their Maturity

As at December 31, 2022, the Company had loans amounting to CZK 29,547 million (maturing at December 31, 2025, September 25, 2028, May 31, 2030). Of that amount, the long-term portion of loans amounted to CZK 27,104 million and the current portion amounted to CZK 2,443 million.

Key Financial Indicators

	Unit	2021	2022

Return on assets, net (ROA Net)	%	4.18	3.90
EBIT margin	%	17.47	17.31
Financial debt to equity	%	29.07	31.57
Net debt to EBITDA	%	180.37	199.81
Current ratio	%	73.21	70.54
Operating cash flow to debt	%	42.19	41.39
Asset turnover	1	0.32	0.29
Fixed asset coverage	%	93.20	92.43
Depreciation-to-fixed assets ratio	%	55.52	55.25

Economic and Financial Outlook for 2023

The year 2023 is the third year of the fifth regulatory period, in which the rules of regulation based on the Price Regulation Principles for the regulatory period of 2021–2025 apply. These rules should ensure coverage of a distribution company's legitimate costs, including the generation of resources for distribution system renovation and development and revenue for shareholders. The volume of purchases and sales of electricity distribution services is based on the expected development of electricity consumption, taking into account the impact of the energy crisis. The Company's plan for 2023 anticipates revenues from sales of own products and services amounting to CZK 46,587 million, income before taxes of CZK 6,118 million, and capital expenditure of CZK 15,108 million.

Capital Expenditure

Principal Goals of Capital Construction

The Company expended CZK 15,033 million on distribution system renovation and development in 2022. The principal objective of capital expenditures is improving the quality, reliability, and safety of electricity supplies.

Capital expenditure was directed into the grids at all voltage levels and was implemented across all asset groups, including distribution grid development and coverage of customer requirements for connection to the distribution grid. In the field of new technologies, capital expenditures were primarily made on projects in digitization, installation of remotely controlled elements in medium-voltage grids, followed by projects for the installation and addition of metering equipment at distribution substations. Our optical infrastructure development project entered its next stage.

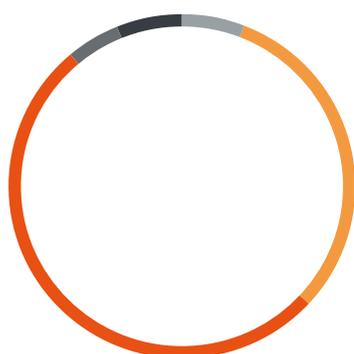

Capital Expenditures in 2021 and 2022, Plan for 2023

Capital Expenditure (CZK Millions)

	2021	2022	2023
HV structures	875	958	1,057
MV structures	4,325	4,603	4,137
LV structures	6,434	7,832	7,577
Electricity meters	649	721	1,054
Ancillary expenditure	955	919	1,283
Total	13,238	15,033	15,108

Capital Expenditures in 2022

	%
● HV structures	6
● MV structures	31
● LV structures	52
● Electricity meters	5
● Ancillary expenditure	6
Total	100

Capital Expenditures on the Distribution System

Capital expenditures in 2022 were principally focused on MV and LV structures. CZK 12,435 million was expended on such assets in 2022. Most of the projects involved reconstructing and renovating underground and overhead lines, as well as constructing the MV parts of HV/MV transformer substations and MV/MV switching substations. Capital expenditures on HV structures amounted to CZK 958 million. Most of the projects concerned reconstructing and constructing new HV/MV transformer substations and HV overhead lines.

CZK 919 million was expended on activities supporting main distribution processes, in particular the enhancement of operating and control systems and purchases of electricity meters in the amount of CZK 721 million.

Capital expenditures on projects initiated at customers' requests totaled CZK 4,939 million.

Major Projects

- Lískovec, 110 kV substation reconstruction
- Kladno–Dříň–Praha Sever, replacement of the HV line
- Lískovec–Frýdlant nad Ostravicí, reconstruction of the HV line
- Dolní Benešov, construction of a 110/22 kV transformer station
- Šumperk–Ráječek, reconstruction of the HV line
- Uničov, construction of a 110/22 kV transformer station
- Červený Kostelec, renovation of a 110/35 kV transformer station
- Uhlířské Janovice, renovation of a 22 kV substation

Information on the Company's Core Business

The Company's core business is providing electricity distribution services to individuals and legal entities. The Company manages distribution system assets and controls the operation of the distribution system from its control center.

In 2022, the distribution system was operated and maintained in line with quality standards and requirements defined in the Preventive Maintenance Regulations to the maximum extent possible. Continuous operation of the distribution system during the year was negatively affected by ten emergency conditions of increased failure rates caused by severe weather, during which there were 5,087 emergency interruptions of electricity distribution with impacts on customers that lasted more than three minutes. Besides those extraordinary interruptions, there were other unplanned interruptions that lasted more than three minutes and affected at least one customer: 32 interruptions at the HV level, 6,047 interruptions at the MV level, and 18,858 interruptions at the LV level. In addition, 6,704 damaged fuses were replaced in customers' main fuse boxes or feeder boxes.

The Company monitors and evaluates indicators concerning the quality and reliability of electricity supply and distribution and the quality of provided services. One of the indicators is the System Average Interruption Duration Index (SAIDI), which represents the total average outage duration per customer during a whole year. An equally important indicator is SAIFI, the average number of electricity distribution interruptions, which reflects the average number of electricity supply interruptions per customer throughout the year. The efficiency of the measures aimed at increasing the continuity of electricity distribution is demonstrated by achieving the bonus resulting from the incentive regulation introduced by the Energy Regulatory Office for the SAIFI indicator.

System Average Interruption Duration Index (Minutes)

ČEZ Distribuce, a. s., owns and operates the following distribution system assets:

Distribution System Infrastructure

	Unit	2021	2022
Installed line length	km	167,628	168,533
Of which: HV	km	10,002	9,998
MV	km	51,295	51,462
LV	km	106,331	107,073
MV/LV transformer substations	Number	60,287	60,527
Of which: Owned by the Company	Number	47,253	47,524
Owned by a third party	Number	13,034	13,003
HV/HV, HV/MV, MV/MV transformer substations	Number	284	285

The Company's distribution system distributed 42,690 GWh of electricity in 2022.

Annual Figures on Electricity Distribution (GWh)

	2021	2022
System inflow		
Supplied from transmission service provider's grid	28,211	25,298
Supplied from facilities owned by ČEZ, a. s.	1,587	1,608
Supplied from neighboring distribution service providers	1,209	1,175
Supplied from facilities owned by other producers, including autoproducers	11,254	11,791
Supplied from other facilities	15	53
Imports (from abroad) at distribution service level	248	543
Distribution license holders (local distribution system)	1,879	2,222
Total system inflow	44,403	42,690
System outflow		
HV/MV customers	12,904	12,494
LV customers	15,957	14,791
Consumed by producers in distribution service provider's grid	1,846	1,968
Consumed by other facilities	15	53
Supplied to neighboring distribution service providers	5,533	5,615
Supplied to transmission service provider's grid	423	586
Exports (to abroad) at distribution service level	118	2
Distribution license holders (local distribution system)	5,844	5,537
Other consumption by distribution service provider	56	51
Losses	1,707	1,593
Total system outflow	44,403	42,690

Electricity inflow into the Company's distribution system was 42,690 GWh in 2022. This was a decrease of 3.86%, or 1,713 GWh, as compared to 2021. The greatest percentage, 59.26%, was electricity inflow from the transmission service provider's grid, which was 25,298 GWh. This was an decrease of 2,913 GWh compared to 2021. The amount of electricity procured directly from the facilities of ČEZ, a. s., was 1,608 GWh, which was 21 GWh more than in 2021. Supplies from neighboring distribution service providers decreased by 34 GWh year-on-year; supplies from facilities owned by other producers, including autoproducers, increased by 537 GWh. The amount of electricity from other facilities increased by 38 GWh. Imports from abroad increased by 295 GWh year-on-year; supplies from local distribution systems increased by 343 GWh.

The amount of electricity distributed to HV and MV customers decreased by 410 GWh year-on-year; electricity distributed to customers at those voltage levels accounted for 29.27% of total supplies. The amount of electricity distributed at LV level decreased by 1,166 GWh and accounted for 34.65% of total supplies. Producers' consumption increased by 122 GWh as compared to 2021; other facilities' consumption increasing then by 38 GWh. Supplies to neighboring distribution service providers increased by 82 GWh year-on-year; their share in the total amount of electricity distributed was 13.15%. The amount supplied back to the transmission service provider's grid increased by 163 GWh. Exports abroad decreased by 116 GWh year-on-year. Supplies to local distribution systems decreased by 307 GWh in a year-on-year comparison. Other consumption decreased by 5 GWh; losses decreased by 114 GWh.

The highest hourly peak was 5,905 MW, achieved on January 12, 2022, at 10 a.m.

Weekly Peaks (MW)

ČEZ Distribuce, a. s. sells its services for electricity distribution to customers through electricity traders or by direct sales. ČEZ Distribuce, a. s., had a framework contract with 140 active traders in 2022.

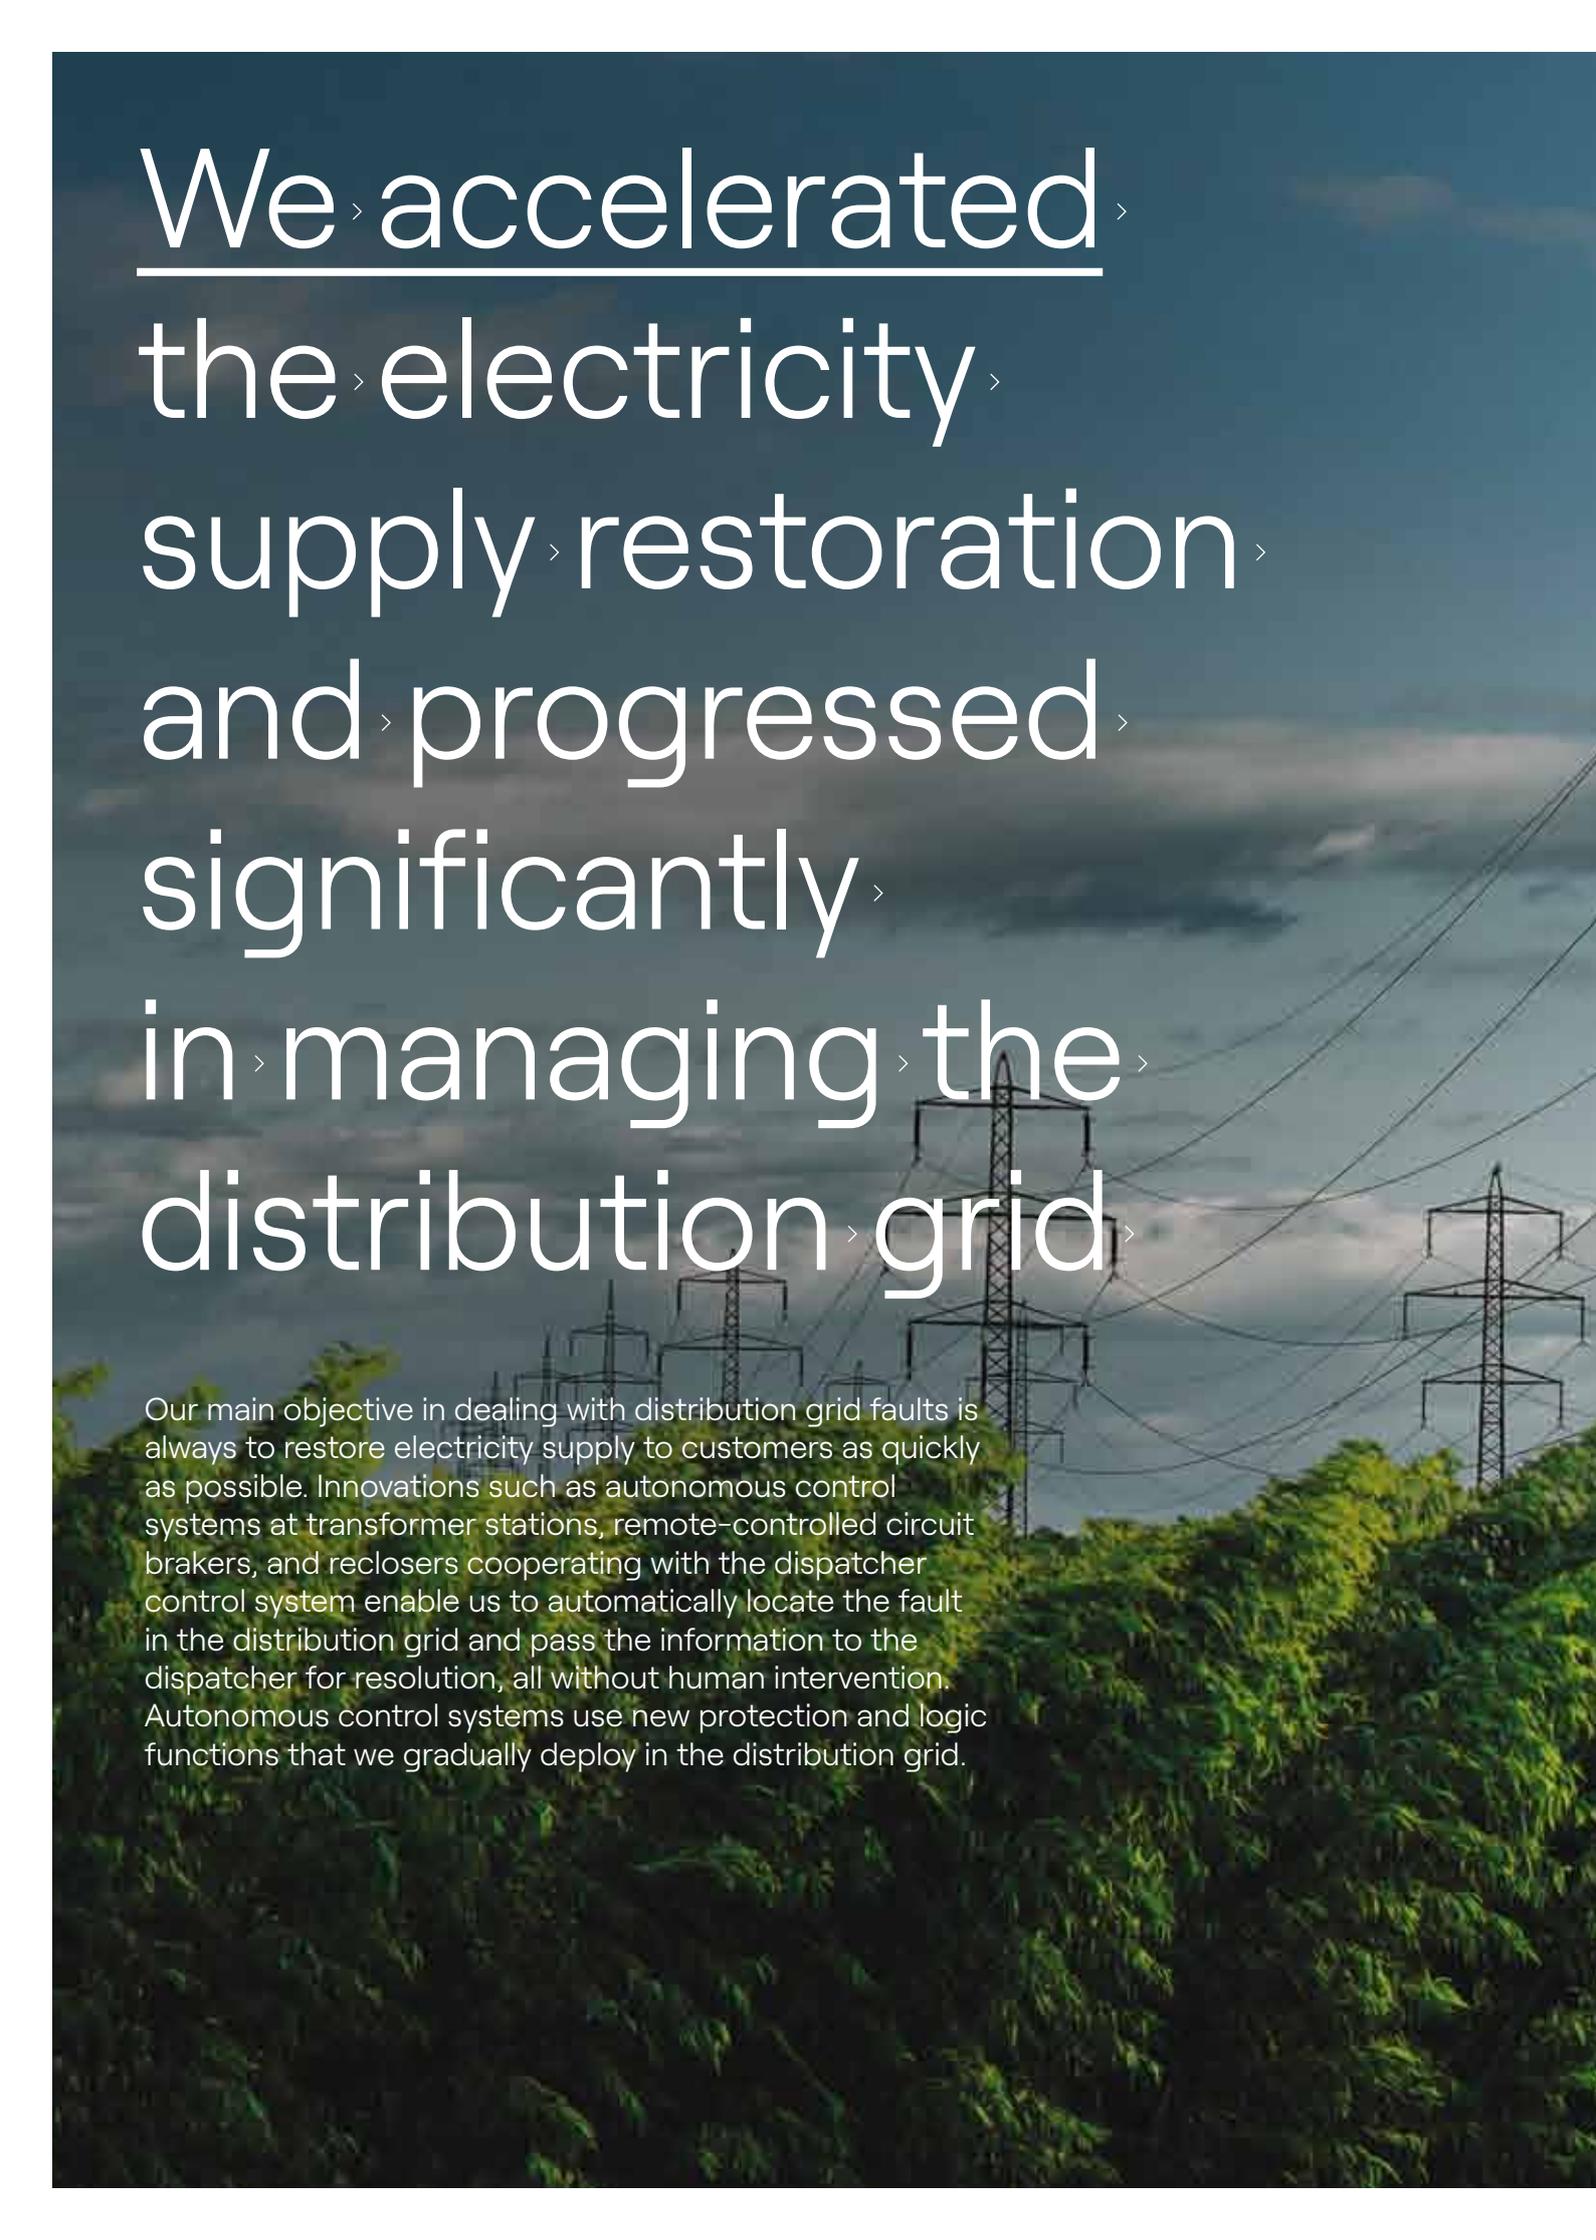

Number of Service Points

	Unit	2021	2022
HV, MV—large end-use customers	Number	14,576	14,683
LV—commercial retail	Number	440,157	442,841
LV—residential retail	Number	3,296,707	3,314,808
Total		3,751,440	3,772,332

More than 21,000 new service points were connected in 2022. Additionally, 21,487 new generating facilities with a total installed capacity of 188 MW were connected in 2022. CZK 1,986 million was collected from customers in contributions towards connection and capacity increases pursuant to Decree No. 16/2016 Sb., on conditions for connection to the electricity system, and CZK 3,472 million was expended on fulfilling their requests in 2022.

New Connections, Increased Capacity

Voltage Level	Expenditure on the Distribution System (CZK Millions)	Selected Shares (CZK millions)	Connected or Increased (MW)
HV	33,945	343,334	1,604
MV	317,570	495,759	714
LV	4,124,439	798,151	883
Total	4,475,954	1,637,244	3,201

We accelerated the electricity supply restoration and progressed significantly in managing the distribution grid

Our main objective in dealing with distribution grid faults is always to restore electricity supply to customers as quickly as possible. Innovations such as autonomous control systems at transformer stations, remote-controlled circuit breakers, and reclosers cooperating with the dispatcher control system enable us to automatically locate the fault in the distribution grid and pass the information to the dispatcher for resolution, all without human intervention. Autonomous control systems use new protection and logic functions that we gradually deploy in the distribution grid.

Safety and Quality Management, Environmental Protection

Occupational Safety and Health

The beginning of 2022 continued to be marked by measures related to the COVID-19 epidemic. Within ČEZ Distribuce, a. s., an internal audit of the OSH management system was carried out in accordance with the "Safe Enterprise" program, which confirmed the functionality of the system and compliance with applicable legislation.

In 2022, ČEZ Distribuce, a. s., suffered 26 work accidents with absences of more than three calendar days, with a total of 1,575 days off work.

The increase in the number of work accidents compared to 2021 can be attributed to the worsened weather conditions at the beginning of 2022 and the associated higher frequency of accidents after falling on icy or snowy roads. Half of the lost-time work injuries were found to be caused by slips, trips, or improper stepping while walking.

Fire Prevention

Fire protection focused on prevention, protecting employees and property from fire, and creating conditions for safe operation of the distribution grid. The Company has set up a functional management system in the area of fire protection. The fulfillment of statutory obligations is ensured by the performance of professionally competent persons. Prevention is fulfilled, among other things, by continuous updating of fire protection documentation, training and professional preparation of employees, as well as control and audit activities of professionally qualified persons and managers of all management levels according to approved annual plans. The Company met the fire protection targets set for 2022. Within the framework of state fire supervision, no serious deficiencies were detected by the state administration authorities. No extraordinary event occurred at the Company during the period—fire with damage exceeding CZK 1 million.

OSH Coordination on Construction Sites

OSH coordination on construction sites is an integral part of the Company's OSH care. During the performance of activities on construction and renovation sites of ČEZ Distribuce, a. s., on the MV and HV voltage levels within the scope stipulated by Act No. 309/2006 Sb., and in the extent of the implementing regulation of Government Decree No. 591/2006 Sb., the fulfillment of legislative requirements was ensured and safety measures were also taken operatively at the place of implementation to the maximum extent. Unfortunately, despite these efforts, one serious accident requiring the hospitalization of a contractor's employee occurred on the construction site due to a violation of OSH rules by the contractor.

Quality Assurance

The Company applies quality standards within all processes. Key process indicators and required process outputs are reviewed by internal audits, checks, and other feedback tools. The achievement of quality indicators and targets is included in the evaluation of business units and employees. Quality management is based on a uniform technical policy, standardization, technical standardization, and metrology. The compliance of management systems, certified to ČSN EN ISO 14001, ČSN EN ISO 50001, and the "Safe Enterprise" program, and also to ČSN EN ISO 9001 for certain processes, is regularly audited by a certification company and the regional occupational safety inspectorate. As part of the physical protection of property, the parameters of its provision are continuously updated, security measures are proposed and implemented to achieve an acceptable level of security.

Environmental Protection

The Company protects the environment in accordance with applicable legislation. The Company's dedicated employees are actively involved in environmental care in all its components, in particular bird protection, waste, packaging and water management, management of chemicals and mixtures, accident prevention, remediation of old environmental burdens, and climate protection. ČEZ Distribuce, a. s., has been protecting birds against electric shock on high-voltage lines since 1990 with the aim of preventing bird mortality caused by perching on high-voltage support points. Either by design or by adding plastic insulator covers, 70% of the support points are now safe. An additional 16,389 safe support points will be added in 2022 at a cost of CZK 47 million. In particular, priority sites for bird protection are continuously addressed in cooperation with the Agency for Nature Conservation and Landscape Protection.

ČEZ Distribuce actively participates in the working group meetings of the Ministry of the Environment of the Czech Republic (MEP), the Ministry of Industry and Trade of the Czech Republic, the Agency for Nature Conservation and Landscape Protection of the Czech Republic, the Czech Ornithological Society, and distribution and transmission system operators. As a result, a methodological guideline of the MEP for "Ensuring the Protection of Birds from Injuries on Power Lines due to Striking Conductors or Ground Wires" is ready for publication. A methodological guideline "Protection of Storks Nesting on Medium- and Low-Voltage Power Line Poles" has been developed.

The Company addresses suggestions of citizens, authorities, and environmental organizations related to the protection of birds on distribution grid installations. There are dozens of cases per year. The most frequent cases concern stork nests on the support points of low-voltage lines, which are solved by relocating the nest on the basis of an exemption granted by the nature protection authority or by insulating bare wires in the vicinity of the nest. Moreover, the condition of stork nests located on the distribution grid equipment is actively monitored by ČEZ Distribuce.

In October, the external EMS and EnMS audit was successfully conducted, which confirmed the compliance of the environmental management system with the requirements of ČSN EN ISO 14001 and the compliance of the energy management system for the operation of technical and nontechnical distribution system equipment with the requirements of ČSN EN ISO 50001.

Shares and Shareholders

The total amount of the stated capital of ČEZ Distribuce, a. s., registered in the Commercial Register at the closing date of the Annual Report was CZK 60,000 million. The Company's sole shareholder is ČEZ, a. s. (www.cez.cz), with its registered office at Praha 4, Duhová 2/1444, Postcode 140 53, company registration number 452 74 649, holding a 100% stake in the stated capital of ČEZ Distribuce, a. s.

Classes and Volumes of Issued Stock

The stated capital is divided into 600 registered materialized common shares of stock with a nominal value of CZK 100 million. The common shares of stock are replaced with a Stock Certificate with a total nominal value of CZK 60,000 million issued to ČEZ, a. s., with its registered office at Praha 4, Duhová 2/1444, Postcode 140 53, company registration number 452 74 649. The Company did not acquire any treasury shares in 2022.

Human Resources

Employment Changes

In the field of labor relations and welfare policy, ČEZ Distribuce, a. s., supported the maintenance of social peace, respecting the Labor Code and related legislation as well as collective agreements in effect at ČEZ Distribuce, a. s.

New Hires and Exits in 2022

	Number of employees
New hires	247
Exits	313

The workforce headcount as at December 31, 2022, was 4,581 employees.

Education and Training

In 2022, in line with previous years, ČEZ Distribuce, a. s., focused on developing and maintaining its employees' core competencies, i.e., both professional and interpersonal skills. To this end, employees attended both internal courses and external training, workshops, seminars, internal mentoring, and custom-tailored courses, which were provided according to their needs and interests, either online or in person. Particular emphasis was placed on the development of key employees by supporting and further developing their potential. The Company focused more on managing generational change, change management, knowledge and skills sharing, training employees in the deployment of new systems, taking on new activities, and generally supporting the development of employees' digital skills. Programs aimed at adapting new employees, supporting managers in working with new employees, and cross-departmental collaboration continued in 2022. These include an adaptation program for new employees, as well as a program for employees who are new to a management role. The role of in-house trainers, employees who use their know-how in internal training on specialist topics, was also supported. Another follow-up year of the 50 Hz Talent Program was prepared. The program is designed to support the development of key employees and their managerial, communication, and psychosocial skills. It focuses on the current topic of transformation, involving the frequently mentioned digitization, as well as issues of generational change, succession, and corporate culture. These topics

are reflected in the Talent Program in the initiatives that the program participants develop into specific projects. It is a comprehensive training program with continuous follow-up. In H1 2022, there was a need to continue addressing the ongoing COVID-19 pandemic. ČEZ Distribuce, a. s., implemented and adjusted its internal regulations to help protect the health of employees. These rules were also applied to external partners. ČEZ Distribuce, a. s., remains cautious in this area and is ready to react to current developments as needed. In 2022, ČEZ Distribuce, a. s., spent a total of CZK 25 million on developing and education of its employees.

Welfare Policy

ČEZ Distribuce, a. s., provides its employees with benefits in the form of monetary and nonmonetary benefits. In the area of nonmonetary benefits, employees mainly enjoy leaves of absence beyond the scope of the Labor Code, shortened weekly working hours, and the opportunity to engage in various nonwork activities, which were to some extent limited by the current pandemic situation especially as recently as the beginning of 2022. For selected occupations specified in the collective agreement, the Company paid for tick-borne encephalitis vaccinations. Employees were offered the opportunity to benefit from flu vaccination at the Company's expense.

The Company expended CZK 287 million on monetary benefits in 2022. Key items that the Company made contributions to in the past year included, most importantly, a Cafeteria, contributions to retirement plans and life insurance, meal plans, health care, and retirement severance pay.

Relations with Labor Unions

There were a total of 32 local labor unions operating at ČEZ Distribuce, a. s., in 2022. Over 2,200 employees were local union members. Collective bargaining on amendments to the effective collective agreement took place in 2022, mainly concerning wages and salaries, and the welfare area. The collective bargaining culminated in the signing of Amendments No. 19 and 20 to the collective agreement. There were a total of 23 regular meetings held between the employer and labor union representatives in 2022, at which information was presented to the labor organizations and topics set down by the Labor Code and the collective agreement were discussed.

Research and Development

The National Center for Energy 1 (NCE1) projects developed in collaboration with universities and other partners were completed at the end of 2022. In the area of method and technology development to improve safety and reliability, this included the Fault Detector Evaluation Software project (VŠB—Technical University of Ostrava) and in the area of new elements and technology for power networks, the Compensation Equipment project (University of West Bohemia in Plzeň). During the year, the assignment of projects that ČEZ Distribuce, a. s., expects to implement in NCE2 was being prepared. These projects will start their activities in 2023. In 2022, the functionality of fault detection on 35 kV overhead lines was developed and verified to help to improve the continuity of electricity supply to customers. Furthermore, experience was gained in the use of drones in inspecting distribution system equipment and in monitoring vegetation in the line protection zone. ČEZ Distribuce, a. s., continued to participate in projects of applied research, experimental development and innovation, including programs announced by the Technology Agency of the Czech Republic. Within the framework of the Théta TAČR call, the Company cooperates on several research and development projects. The projects address the reliability of power supply, but also the development of elements for flexibility prediction and control.

In the OneNet project (co-funded by the Horizon 2020 program), ČEZ Distribuce, a. s., is testing the concept of using the flexibility of fleet charging stations for electric vehicles through a platform for the involvement of new market players. Both the existing and newly built fleet non-public charging stations owned by the Company will be used to test the concept. In its pilot mode, the network semaphore functionality has been launched, informing the power balance service providers on a common platform of distribution and transmission system operators about distribution grid unavailability—faults and outages in near real time data transmission mode. In particular, the development of a single integration interface and data format for the automated sharing of this information has been a success in this area. In 2022, the design of the second milestone of the project, a platform for non-frequency network services, was completed to test the purchase/sale of uniform types of non-frequency flexibility products. All demonstration projects have also started testing integration into the central information platform of the OneNet project called OneNet Connector.

Donations and Sponsorship Program

Donations

ČEZ Distribuce, a. s., contributed a total of CZK 100 million to projects undertaken by the ČEZ Foundation (www.nadacecez.cz) in 2022. The ČEZ Foundation's support went into developing leisure-time activities for children and youth, improving the quality of life for disadvantaged people, and improving the civic amenities of municipalities in regions where ČEZ Distribuce, a. s., operates.

Financial donations made directly by ČEZ Distribuce, a. s., totaled CZK 5.015 million in 2022. This amount was distributed among 15 selected entities that supported education, culture, public space cultivation, youth leisure activities, and environmental protection. In addition, the Company made an in-kind donation to Ukraine in the form of movable assets in the amount of CZK 1.917 million.

The Company contributed CZK 4.543 million to the CEZ GROUP SENIORS Endowment Fund in 2022.

Developments in the Legislative Framework for the Energy Sector

The basis of the legislative framework for electricity distribution consists of the following regulations, as amended, more information can be found at:

[http://www.cezdistribuce.cz/cs/energeticka-legislativa:](http://www.cezdistribuce.cz/cs/energeticka-legislativa)

- Act No. 458/2000 Sb., on the conditions for doing business and exercising state administration in energy industries and on amendments to some acts (Energy Act)
- Act No. 165/2012 Sb., on supported energy sources and on amendments to some acts (Supported Sources Act)
- Act No. 406/2000 Sb., on energy management
- Act No. 194/2017 Sb., on measures to reduce the cost of deploying high-speed electronic communications networks and on amendment to certain related acts
- Act No. 183/2006 Sb., on land use planning and the building code (Building Act)
- Act No. 416/2009 Sb., on accelerated construction of transport, water, energy, and electronic communications infrastructures (Line Act)
- Act No. 184/2006 Sb., on revoking or restricting ownership of land or buildings (the Expropriation Act)
- Decree No. 408/2015 Sb., on Electricity Market Rules
- Decree No. 194/2015 Sb., on the manner of price regulation and procedures for price regulation in the electricity and heat sectors
- Decree No. 262/2015 Sb., on regulatory reporting
- Decree No. 540/2005 Sb., on the quality of electricity supplies and related services in the electricity sector
- Decree No. 207/2021 Sb., on the billing of supplies and related services in the energy sectors
- Decree No. 80/2010 Sb., on a state of emergency in the electricity sector and on requirements for the contents of an emergency plan
- Decree No. 8/2016 Sb., on the details of licensing for doing business in the energy sectors
- Decree No. 16/2016 Sb., on conditions for connection to the electricity system
- Decree No. 359/2020 Sb., on electricity metering
- Decree No. 401/2010 Sb., on requirements for the contents of Transmission System Operation Rules, Distribution System Operation Rules, Transmission System Operator Codes, Distribution System Operator Codes, Gas Storage Operator Codes, and Market Operator Business Conditions
- Decree No. 404/2016 Sb., on the particulars and structure of report forms required for the preparation of reports on system operation in energy industries, including reporting dates, scope, and rules (Statistics Decree)
- Decree No. 79/2010 Sb., on dispatch control of the electricity system and on the transmission of data for dispatch control
- Decree No. 80/2010 Sb., on a state of emergency in the electricity sector and on requirements for the contents of an emergency plan

In 2022, the following important legislation was amended from the perspective of electricity distribution:

Act No. 458/2000 Sb., on the conditions for doing business and exercising state administration in energy industries and on amendments to some acts (Energy Act), was amended by a total of four amendments in 2022:

- On June 15, 2022, an amendment was published in the Collection of Laws under No. 176/2022 Sb., with effect from June 15, 2022
- On July 27, 2022, an amendment was published in the Collection of Laws under No. 232/2022 Sb., with effect from July 28, 2022
- On September 20, 2022, an amendment was published in the Collection of Laws under No. 287/2022 Sb., with effect from September 21, 2022
- On November 24, 2022, an amendment was published in the Collection of Laws under No. 365/2022 Sb., with effect from November 25, 2022

The above amendments to the Energy Act, among other things, implemented or modified measures in the areas of supplier of last resort, the contribution to electricity and gas costs, emergency and market situations, and the levy on excess revenues.

During 2022, Act No. 165/2012 Sb., on supported energy sources and on amendments to certain acts, was amended under No. 143/2022 Sb., with no impact in the area of electricity distribution.

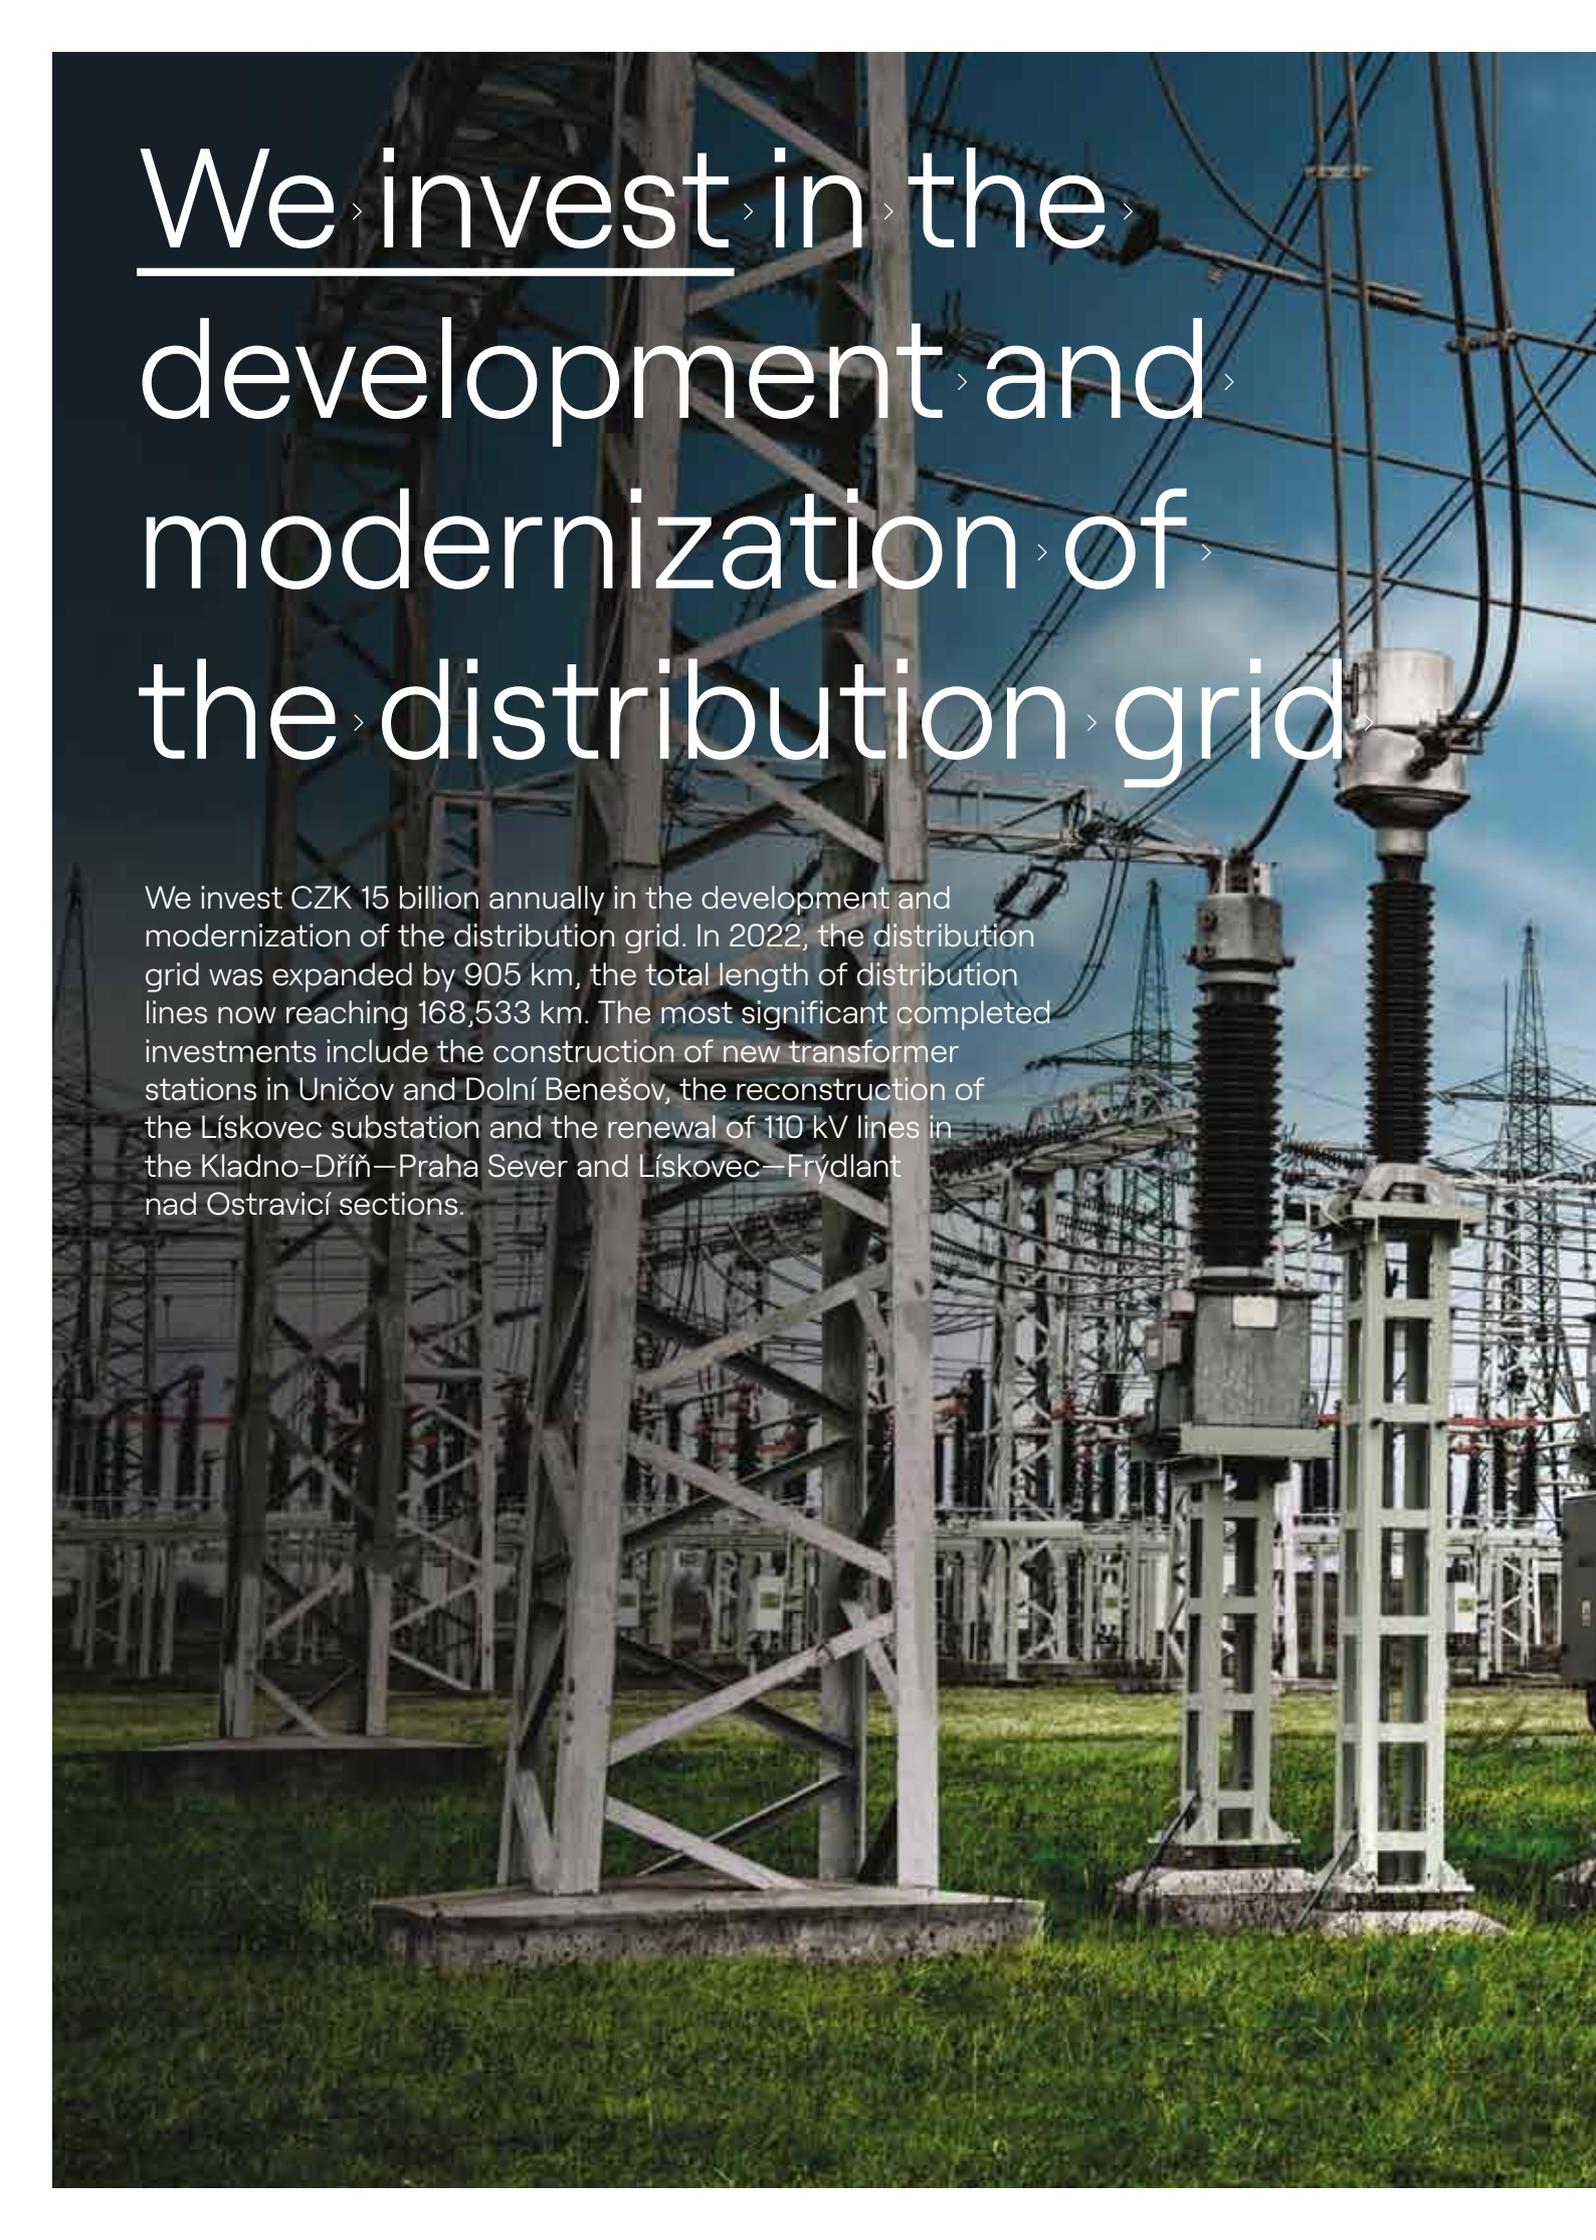

On December 6, 2022, an amendment to Decree No. 404/2022 Sb., amending Decree No. 408/2015 Sb., on electricity market rules, as amended, was published in the Collection of Laws with effect from January 1, 2023; the Decree responds to a number of European Commission regulations, primarily regulating electricity sharing in residential buildings, billing information, and the area of supplier of last resort.

In addition, other regulations affecting electricity distribution were issued or amended in 2022:

On October 24, 2022, an amendment to Decree No. 328/2022 Sb., was published in the Collection of Laws, repealing and replacing Decree No. 403/2015 Sb., on guarantees of origin for electricity from renewable energy sources and electricity from high-efficiency combined generation of electricity and heat (as amended). The amendment regulates the registration of energy generating facilities for issuing guarantees of origin, the procedures, conditions, and time limits for issuing, transferring, exercising, recognizing, removing, and canceling guarantees of origin, the requirements for the application for issuing guarantees of origin and transferring guarantees of origin, the method of transmitting information and verifying data necessary for issuing guarantees of origin, the method of transferring, recognizing, exercising, removing, and canceling guarantees of origin, and the keeping of accounts in the guarantees of origin register, the rules for transferring guarantees of origin for advanced biomethane, and the method for determining the share of gas suppliers in the total supply of natural gas and biomethane.

On October 5, 2022, Government Decree No. 298/2022 Sb., was published in the Collection of Laws on the determination of electricity and gas prices in an extraordinary market situation, effective from January 1, 2023. This decree sets the maximum price of electricity and gas and the fixed price for the supply of electricity and gas to the customer's service point. That Regulation will be repealed as at January 1, 2024. On December 7, 2022, Government Decree No. 407/2022 was published in the Collection of Laws, on the method of determining the amount of excess income from the sale of generated electricity, effective from December 8, 2022. The decree regulates the method of determining the amount of excessive income based on net sales of generated electricity. On December 21, 2022, Government Decree No. 463/2022 was published in the Collection of Laws, on the determination of electricity and gas prices for electricity and gas losses in the distribution grids in the electricity and gas sector in an extraordinary market situation, with effect from January 1, 2023. The decree implements the provisions of Sections 19d(1) and (4) and 19f(8) of the Energy Act as amended by No. 287/2022 Sb. On December 21, 2022, Government Decree No. 470/2022 Sb., on the procedure for determining the amount of aid and the repayment of aid under the Supported Energy Sources Act was published in the Collection of Laws, with effect from January 1, 2023. The decree sets out the rules and procedure for the retroactive payment of aid for using traction electricity following notification of a decision on the aid's compatibility with the internal market of the European Union.

Disclaimer: The Developments in the Legislative Framework for the Energy Sector section contains selected information concerning legislation and was drawn up with the greatest care possible. However, it cannot be regarded as qualified legal advice. ČEZ Distribuce, a. s., may not be held liable for any legal act performed or refrained from by anyone on the basis of the provided overview.

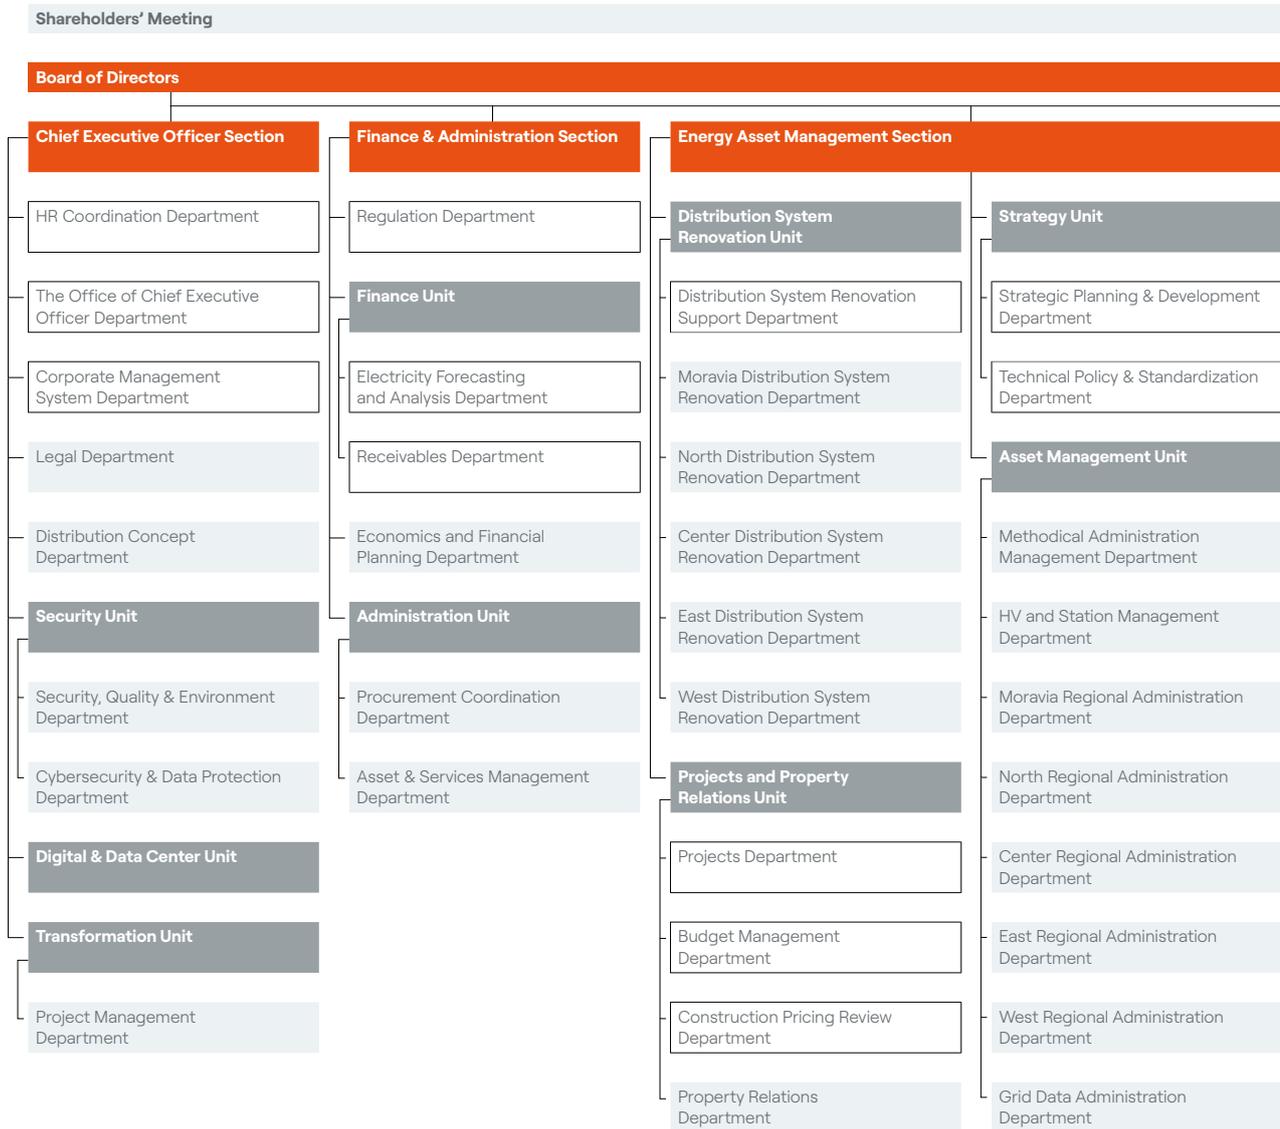

We invest in the development and modernization of the distribution grid

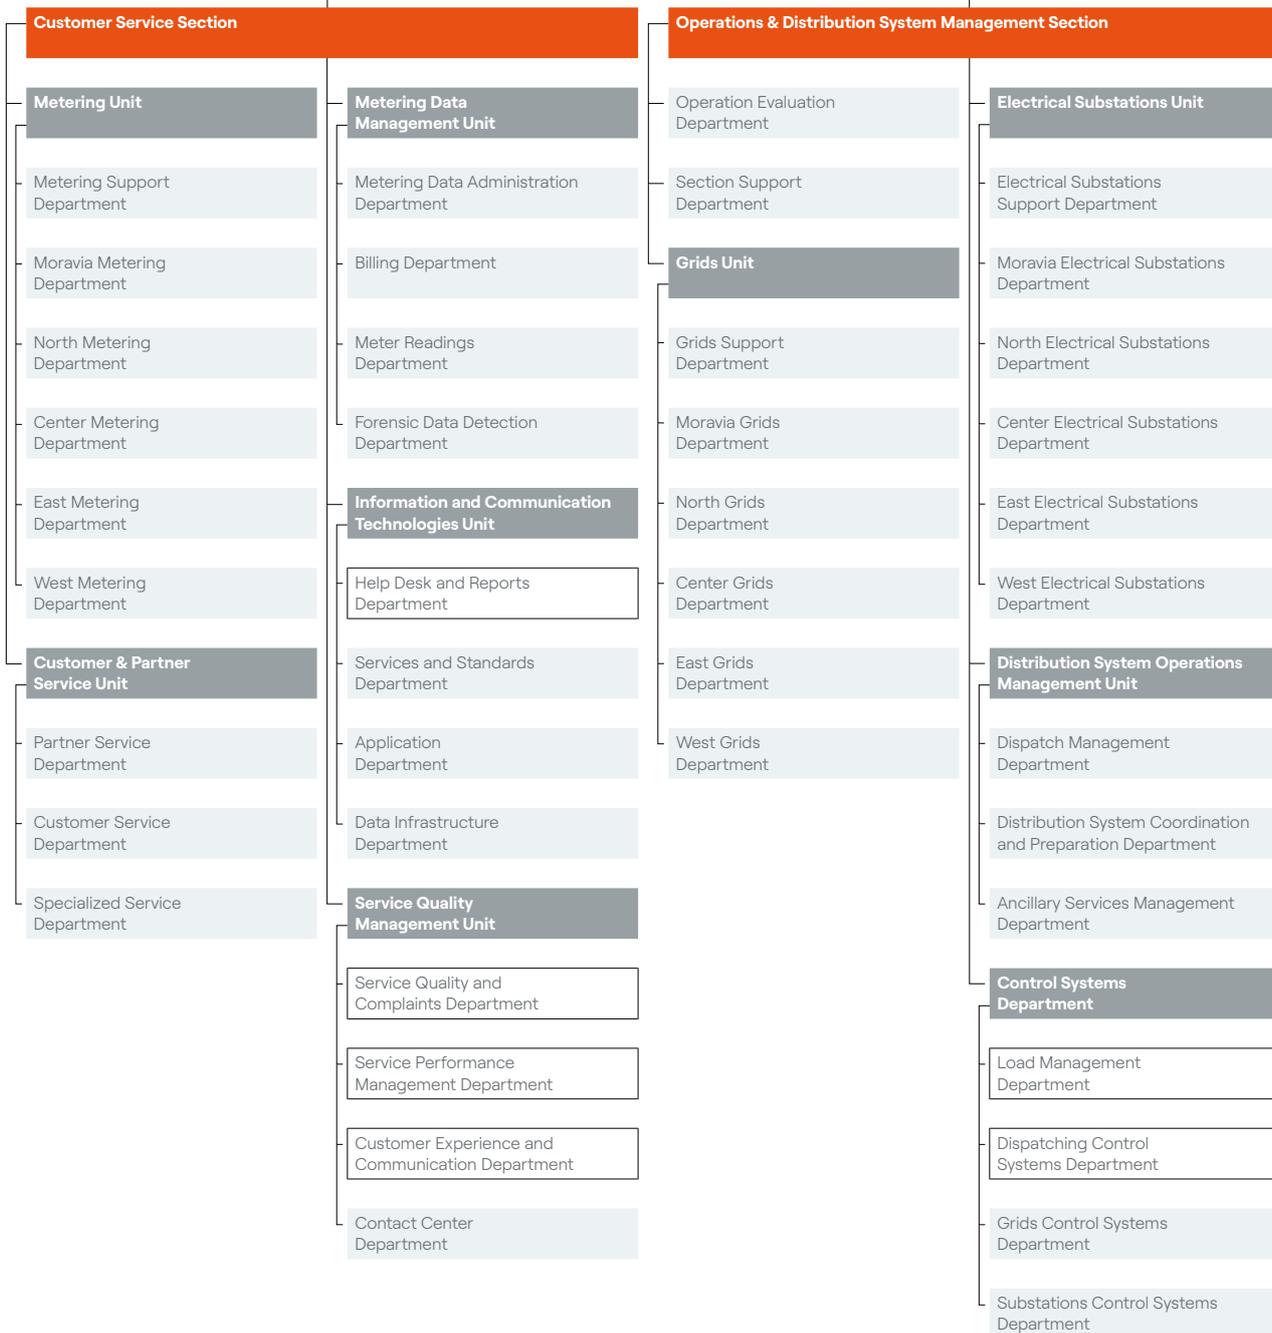

We invest CZK 15 billion annually in the development and modernization of the distribution grid. In 2022, the distribution grid was expanded by 905 km, the total length of distribution lines now reaching 168,533 km. The most significant completed investments include the construction of new transformer stations in Uničov and Dolní Benešov, the reconstruction of the Lískovec substation and the renewal of 110 kV lines in the Kladno-Dříň–Praha Sever and Lískovec–Frýdlant nad Ostravicí sections.

Basic Organization Chart of ČEZ Distribuce, a. s., as at April 1, 2023

Supervisory Board

Glossary of Terms and Abbreviations

Glossary of Terms and Abbreviations

Terms and Abbreviations	Commentary
Cash pooling	A method of optimizing the management of bank accounts; using this method, the balances on the accounts of the participating companies are consolidated on a daily basis; contractually agreed credit and debit interest is calculated for the accounts involved in cash pooling
Czechia	Czech Republic
ČSN	Czech national standard
Distribution system (DS)	An interconnected set of 110 kV lines and equipment, except selected 110 kV lines and equipment that are part of the transmission system, and 0.4/0.23 kV, 3 kV, 6 kV, 10 kV, 22 kV, and 35 kV lines and equipment that serve to distribute electricity in a defined area of Czechia, including metering, protective, control, safeguarding, information, and telecommunications systems
E2E	End-to-end; successive processes where one ends and the other begins
EBIT	Earnings before interest and taxes
EBITDA	Earnings before interest, taxes, depreciation, and amortization
Electricity market operator (OTE)	A joint-stock company founded by the government, whose task is to organize the electricity market in Czechia, reconcile agreed and actual supply and consumption for market participants, ensure the settlement of differences between agreed and actual supplies, and organize the electricity spot market
EMS	Environmental management systems
EnMS	Energy management system
HV	High voltage—distribution infrastructure with phase-to-phase voltage over 52 kV
Large customers	Customers that use electricity from medium- and high-voltage grids
LV	Low voltage—distribution infrastructure with phase-to-phase voltage of 1 kV or less
MV	Medium voltage—distribution infrastructure with phase-to-phase voltage from 1 kV to 52 kV
OSH	Occupational safety and health
POZE	Supported energy sources
Renewable energy sources (RES)	Energy sources that are naturally renewable; these are hydroelectric, geothermal, solar, wind, or biomass combustion energy
Retail customers	The category of electricity consumption in which registered electricity consumers are connected to low-voltage networks (up to 1 kV); this category is further subdivided into residential and business customers
ROA	Return on assets
ROE	Return on equity
SAIDI—System Average Interruption Duration Index	Electricity distribution continuity indicator; the average cumulative duration of disruptions in the electricity distribution to customers on the grid during the period under assessment; expressed as minutes/year/customer
SAIFI—System Average Interruption Frequency Index	Electricity distribution continuity indicator; the average cumulative number of disruptions in the electricity distribution to customers on the grid during the assessment period; expressed as number/year/customer
Transmission system (TS)	An interconnected set of 400 kV and 220 kV lines and equipment and selected 110 kV lines and equipment that serves for electricity transmission throughout Czechia and interconnection with the electricity systems of neighboring countries, including metering, protective, control, safeguarding, information, and telecommunications systems; the transmission system is established and operated in the public interest

List of Units and Abbreviations Used

Unit	Name
GWh	Gigawatt-hour; 1 GWh = 10 ⁹ Wh = 10 ⁶ kWh; Wh = unit of energy
km	Kilometer
kV	Kilovolt; 1 kV = 10 ³ V; V = unit of electric potential (voltage)
kW	Kilowatt; 1 kW = 10 ³ W; W = unit of power
m	Million
MVA	Megavolt-ampere; 1 MVA = 10 ⁶ VA; VA = unit of apparent (total) power
MW	Megawatt; 1 MW = 10 ⁶ W = 10 ³ kW; W = unit of power

Methods Used to Calculate Financial Indicators

Indicator	Description
Asset Turnover	Earnings after Taxes / Average Total Assets
Current Ratio	Long-Term Liabilities including Current Portion + Short-Term Loans – Cash and Cash Equivalents – Highly Liquid Financial Assets
Depreciation-to-Fixed Assets Ratio	-1 * (Accumulated Depreciation and Allowances for Tangible Fixed Assets) / Depreciated Tangible Fixed Assets in Use, Gross
EBIT	Earnings before Taxes and Other Expenses and Revenues + Depreciation and Amortization
EBIT Margin	(Long-Term Liabilities including Current Portion + Bonds + Short-Term Loans) / Average Equity
EBITDA	(Equity + Noncontrolling Interests + Long-Term Liabilities + Deferred Tax Liability) / Fixed Assets
Financial Debt to Equity	Total Operating Revenue / Average Assets
Fixed Asset Coverage	Operating Cash Flow / Long-Term Liabilities
Net Debt	Earnings after Taxes (profit or loss in the reporting period)
Net Debt to EBITDA	Earnings before Taxes and Other Expenses and Revenues
Net Income	EBIT / Operating Revenue
Operating Cash Flow to Debt	Earnings after Taxes / Average Equity
Return on Assets, Net (ROA Net)	-1 * (Accumulated Depreciation and Allowances for Tangible Fixed Assets) / Depreciated Tangible Fixed Assets in Use, Gross
Return on Equity, Net (ROE Net)	Earnings after Taxes / Average Equity
Total Debt to Total Capital	(Long-Term Liabilities including Current Portion + Bonds + Short-Term Loans – Cash and Cash Equivalents – Highly Liquid Financial Assets) / Earnings before Taxes and Other Expenses and Revenues + Depreciation and Amortization

We › prepare › for › an › emission-free › future › and › support › the › transition › to › electromobility ›

We have launched the Green Fleet project, which aims to transition to electric vehicles and build our own charging infrastructure. This will provide us with enough charging points for our own purposes within three years. In the next 5 years we plan to acquire at least 570 electric vehicles.

Related Parties Report for 2022

The Board of Directors of ČEZ Distribuce, a. s., company reg. No.: 24729035, having its registered office at Děčín—Děčín IV—Podmokly, Teplická 874/8, postcode 405 02, registered in the Commercial Register maintained by the Regional Court in Ústí nad Labem under file No. B 2145 (hereinafter referred to as the “Company”), in accordance with Section 82 of Act No. 90/2012 Sb., on commercial companies and cooperatives (Business Corporations Act), as amended, has prepared and approved this Report on Relations between the Controlling Entity and the Controlled Entity and between the Controlled Entity and Entities Controlled by the Same Controlling Entity for the Accounting Period from January 1, 2022 to December 31, 2022 (hereinafter referred to as the “Related Parties Report”). When preparing this Related Parties Report, the Company’s Board of Directors applied knowledge and information available to members of the Company’s Board of Directors on the date of its preparation.

1. Structure of Relations between the Controlling Entity and the Controlled Entity and between the Controlled Entity and Entities Controlled by the Same Controlling Entity

Controlled and Managed Entity—Author
of the Related Parties Report:

ČEZ Distribuce, a. s.

Company reg. No.: 24729035

Registered office: Děčín—Děčín IV—Podmokly, Teplická 874/8, postcode 405 02

Registered in the Commercial Register maintained by the Regional Court in Ústí nad Labem, under file ref. B 2145.

Controlling/Managing Entity:

ČEZ, a. s.

Company reg. No.: 45274649

Registered office: Praha 4, Duhová 2/1444, postcode 140 53

Registered in the Commercial Register maintained by the Municipal Court in Prague, under file ref. B 1581 (hereinafter referred to as the “Controlling Entity”).

As at December 31, 2022, the Controlling Entity owned shares of stock corresponding to a 100% share in the stated capital of ČEZ Distribuce, a. s.

ČEZ Distribuce, a. s., is in the position of a Controlled Entity and also in the position of a Managed Entity due to its membership in CEZ Concern, which is managed by ČEZ, a. s. Other members of CEZ Concern in the financial year 2022 were also the following Managed Entities:

AirPlus, spol. s r.o.

Areál Třeboradice, a.s.

AZ KLIMA a.s.

ČEZ Energetické produkty, s.r.o.

ČEZ Energetické služby, s.r.o.

ČEZ Energo, s.r.o.

ČEZ ENERGOSERVIS spol. s r.o.

ČEZ ESCO, a.s.

ČEZ ICT Services, a. s.

ČEZ Invest Slovensko, a.s.

ČEZ Obnovitelné zdroje, s.r.o.

ČEZ Prodej, a.s.

ČEZ Teplárenská, a.s.

Elektrárna Dukovany II, a. s.

Elektrárna Temelín II, a. s.

Energetické centrum s.r.o.

Energotrans, a.s.

ENESA, a.s.

HA.EM OSTRAVA, s.r.o.

KART, spol. s r.o.

in PROJEKT LOUNY ENGINEERING s.r.o.

MARTIA a.s.

PRODECO, a.s.

Revitrans, a.s.

Severočeské doly a.s.

SD - Kolejová doprava, a.s.

Telco Infrastructure, s.r.o.

Telco Pro Services, a. s.

TENAUR, s.r.o.

Ústav aplikované mechaniky Brno, s.r.o.

The CEZ Concern is part of a group of businesses controlled by the Czech Republic, represented by the Ministry of Finance. The Czech Republic, represented by the Ministry of Finance, owns shares corresponding to 69.78% of the share capital of ČEZ, a. s.

The Controlling Entity, ČEZ, a. s., has prepared a relation structure diagram for the entire group of businesses controlled by the Czech Republic, represented by the Ministry of Finance. This diagram shows, among other things, the relations between the Controlling Entity and the Controlled Entity and between the Controlled Entity and entities controlled by the same Controlling Entity in the accounting period from January 1, 2022 to December 31, 2022, for which the Related Parties Report is prepared. The Board of Directors of ČEZ Distribuce, a. s., has no objections to the relation structure diagram. The relation structure diagram is presented in Annex 1 hereto and is an integral part hereof.

2. Role of the Controlling Entity in the Group of Businesses

CEZ Group's core business is the generation, distribution, trading, and sale of electricity and heat, trading and sale of natural gas, provision of comprehensive energy services in the new energy sector, and coal extraction. ČEZ Distribuce, a. s., as a CEZ Group member and a subsidiary of ČEZ, a. s., its sole shareholder, provides mainly licensed activities of a distribution grid operator and other activities and services related to the performance of the above-mentioned licensed activities. ČEZ Distribuce, a. s., performs all its activities in accordance with the business licenses it holds within the scope of its business defined in the Company's bylaws and registered in the Commercial Register.

3. Manner and Means of Control

ČEZ, a. s., is the sole shareholder of ČEZ Distribuce, a. s., which gives it 100% of the voting rights. The exercise of the rights associated with the voting rights is the basic means of controlling ČEZ Distribuce, a. s., in particular through the appointment or removal of the members of the statutory body and the majority of the members of the Supervisory Board.

Within the framework of corporate governance, ČEZ, a. s., may give binding instructions to the entities under its control and may issue general and operational corporate instruments for this purpose. General concern instruments are shared CEZ Group documents and the Managing Entity's internal documents that are also intended for Managed Entities. Operating concern instruments are concern instructions given on an ad hoc basis. Fundamental documents having concern-wide application are Concern Management Policies governing primarily areas and activities that should be subjected to concern management and follow concern interests. Other means of control within the CEZ Concern include mainly the approval of strategic programs, business strategies, business plans, and annual budgets.

In the case of ČEZ Distribuce, a. s., and ČEZ Energetické služby, s.r.o., concern management is applied in full respect of all requirements of the unbundling rules resulting from Act No. 458/2000 Sb., on the conditions for doing business and exercising state administration in energy industries and amending certain acts (Energy Act), as amended, and Directive (EU) 2019/944 of the European Parliament and of the Council of June 5, 2019 concerning common rules for the internal market in electricity and amending Directive 2012/27/EU, as amended.

4. List of Acts Performed in the Last Accounting Period That Were Performed at the Instigation or in the Interest of the Managing Entity or Entities Controlled by the Controlling Entity and Concerned Assets Exceeding 10% of the Equity of the Controlled Entity as Identified in the Financial Statements for the Financial Year Immediately Preceding the Financial Year for Which the Related Parties Report is Prepared

In the 2022 period, ČEZ Distribuce, a. s., did not perform any acts that would have been performed at the instigation of or in the interest of the Controlling Entity or entities controlled by the Controlling Entity regarding assets that exceed 10% of the equity of ČEZ Distribuce, a. s., as determined according to the financial statements for the accounting period immediately preceding the accounting period for which the Related Parties Report is prepared.

5. List of Mutual Contracts between the Controlled Entity and the Controlling Entity or between Controlled Entities

The Board of Directors of ČEZ Distribuce, a. s., has prepared the List of Mutual Contracts between ČEZ Distribuce, a. s., and the Controlling Entity, ČEZ, a. s., and between ČEZ Distribuce, a. s., and entities controlled by the same Controlling Entity, which were valid and effective in the accounting period from January 1, 2022 to December 31, 2022. The List of Mutual Contracts forms Annex 2 hereto. In view of the need to ensure the protection of commercial confidentiality and the contractual obligation of confidentiality, the List of Mutual Contracts does not contain additional data and information on individual contractual relationships beyond the information contained therein.

6. Loss Incurred by the Controlled Entity and Its Settlement

All transactions between ČEZ Distribuce, a. s., and the Controlling Entity or entities controlled by the same Controlling Entity were concluded under normal market conditions. The Board of Directors of ČEZ Distribuce, a. s., further states that ČEZ Distribuce, a. s., has not been harmed in any way by the actions of the Controlling Entity or an entity controlled by the same Controlling Entity.

In view of the foregoing, it may be concluded that ČEZ Distribuce, a. s., did not incur any damage in the accounting period from January 1, 2022 to December 31, 2022 on the basis of contractual and other relationships with related parties that should be compensated pursuant to Section 71 or Section 72 of Act No. 90/2012 Sb., on commercial companies and cooperatives (Business Corporations Act), as amended.

7. Conclusion

The Board of Directors of ČEZ Distribuce, a. s., has not noted any disadvantages arising from relations between the Controlling Entity and the Controlled Entity or from relations with entities controlled by the same Controlling Entity. The Board of Directors is also not aware of any risks arising from these relationships beyond the extent customary in business relationships between independent entities.

For ČEZ Distribuce, a. s., the benefits of relations within CEZ Group prevailed in the accounting period of 2022, consisting mainly of financial strength, a reputable brand name, shared values, corporate culture, and uniform standards in risk management and occupational safety and health. ČEZ Distribuce, a. s., also uses the synergies within CEZ Group, its professional potential for effective performance of its licensed activities and related ancillary services, and involvement in the system of internal control mechanisms, insurance program, safety and quality management system.

The Board of Directors of ČEZ Distribuce, a. s., declares that the Related Parties Report has been prepared to the best of its knowledge and that the Board of Directors of ČEZ Distribuce, a. s., has made every effort in obtaining and verifying information for the purposes of this Related Parties Report.

8. Annexes

Annex 1 Relation Structure Diagram for the Period from January 1, 2022 to December 31, 2022

Annex 2 List of Mutual Contracts between the Controlled Entity and the Controlling Entity or between Controlled Entities

The Related Party Report is subject to verification by an auditor and will be submitted to the Supervisory Board of ČEZ Distribuce, a. s., for review in accordance with the provisions of Section 12(8)(d) in conjunction with Section 19(3)(d) of the bylaws of ČEZ Distribuce, a. s.

The Board of Directors of ČEZ Distribuce, a. s., approved this Related Parties Report on February 27, 2023.

(Translation of a report originally issued in Czech – see Note 1 to the financial statements.)

Independent Auditor's Report

To the Shareholder of ČEZ Distribuce, a. s.:

Opinion

We have audited the accompanying financial statements of ČEZ Distribuce, a. s. (the Company) prepared in accordance with accounting principles generally accepted in the Czech Republic, which comprise the balance sheet as at 31 December 2022, and the income statement, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information. For details of the Company, see Note 1 to the financial statements.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2022, and of its financial performance and its cash flows for the year then ended in accordance with accounting principles generally accepted in the Czech Republic.

Basis for Opinion

We conducted our audit in accordance with the Act on Auditors and Auditing Standards of the Chamber of Auditors of the Czech Republic, which are International Standards on Auditing (ISAs), as amended by the related application clauses. Our responsibilities under this law and regulation are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Act on Auditors and the Code of Ethics adopted by the Chamber of Auditors of the Czech Republic and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

In compliance with Section 2(b) of the Act on Auditors, the other information comprises the information included in the Annual Report other than the financial statements and auditor's report thereon. The Board of Directors is responsible for the other information.

Our opinion on the financial statements does not cover the other information. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. In addition, we assess whether the other information has been prepared, in all material respects, in accordance with applicable law or regulation, in particular, whether the other information complies with law or regulation in terms of formal requirements and procedure for preparing the other information in the context of materiality, i.e. whether any non-compliance with these requirements could influence judgments made on the basis of the other information.

Based on the procedures performed, to the extent we are able to assess it, we report that:

- The other information describing the facts that are also presented in the financial statements is, in all material respects, consistent with the financial statements; and
- The other information is prepared in compliance with applicable law or regulation.

In addition, our responsibility is to report, based on the knowledge and understanding of the Company obtained in the audit, on whether the other information contains any material misstatement. Based on the procedures we have performed on the other information obtained, we have not identified any material misstatement.

A member firm of Ernst & Young Global Limited
Ernst & Young Audit, s.r.o. with its registered office at Na Florenci 2116/15, 110 00 Prague 1 – Nove Mesto,
has been incorporated in the Commercial Register administered by the Municipal Court in Prague,
Section C, entry no. 88504, under Identification No. 26704153.

Responsibilities of the Company's Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the Czech Republic and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with above regulations will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the above law or regulation, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

ČEZ Distribuce, a. s.

Notes to Financial Statements

for the Year Ended 31 December 2022

1. Description of the Company

ČEZ Distribuce, a. s. ("the Company") was founded, based on a merger by consolidation, as a successor company of the dissolving companies ČEZ Distribuční zařízení, a.s., and ČEZ Distribuce, a. s., with a merger decisive date 1 January 2010 and an effective date as of 1 October 2010. As a result of the merger by consolidation, the assets and liabilities, including employment related rights and obligations, of the dissolving companies were transferred to the successor company.

The Company's registered office is located at Děčín IV-Podmokly, Teplická 874/8, post code: 405 02, Czech Republic, and the business registration number (IČ) is 24729035. The Company is involved in the operation of the power grid and in the distribution of electricity to individuals and legal entities.

The sole shareholder is ČEZ, a. s., Duhová 2/1444, post code: 140 53, Prague 4, business registration number (IČ): 45274649.

The Company is included in the ČEZ Group and in the consolidated group of the parent company ČEZ, a. s.

Members of the statutory bodies as at 31 December 2022 were as follows:

Board of Directors		Supervisory Board	
Chair:	Martin Zmelík	Chair:	Daniel Beneš
Vice-Chair:	Radim Černý	Vice-Chair:	Pavel Cyrani
Member:	Martin Molinger	Member:	Marek Šlégl
Member:	Lucie Masopustová	Member:	Karel Čech
		Member:	Václav Rašner
		Member:	Jan Brožik

On 29 September 2022, the Board of Directors of ČEZ Distribuce, a. s. discussed a letter of resignation of Petr Žejdlík and approved termination of his term of office as member of the Board of Directors at his own request as at 30 September 2022.

These facts correspond to the entry in the Commercial Register as at 31 December 2022.

The Company's organizational structure is as follows:

- CEO Office
- Finance & Administration Division
- Energy Assets Administration Division
- Customer Services Division
- Grid Operations and Management Division

2. Basis of Presentation of the Financial Statements

The accompanying financial statements were prepared in accordance with the Czech Act on Accounting and the related guidelines as applicable for 2022 and 2021.

The financial statements for the year ended 31 December 2022 have been prepared assuming that the Company will continue as a going concern.

Explanation Added for Translation into English

These financial statements are presented on the basis of accounting principles and standards generally accepted in the Czech Republic. Certain accounting practices applied by the Company that conform with generally accepted accounting principles and standards in the Czech Republic may not conform with generally accepted accounting principles in other countries.

3. Summary of Significant Accounting Policies

The accounting policies applied by the Company in preparing the 2022 and 2021 financial statements are as follows:

a) Intangible Fixed Assets

Intangible fixed assets are recorded at their acquisition cost and related expenses. Interest on loans and borrowings are not considered to be part of these costs.

Intangible fixed assets with a cost exceeding CZK 60 thousand acquired until 31 December 2020 and exceeding CZK 80 thousand starting 1 January 2021 onwards are amortized over their useful economic lives.

Intangible fixed assets include software provided that it has been developed internally for trading purposes, or it has been acquired from other parties, irrespective of its cost. The above also applies to software licenses, if such licenses are not part of the valuation of the acquired software, or part of the technical improvement of the existing software.

Amortization

Amortization is calculated based on the acquisition cost and the estimated useful life of the related asset.

The useful economic lives are as follows:

	Years
Research and development	6
Software	4-6
Other valuable rights	6
Other intangible fixed assets	6

The costs of technical improvements of intangible fixed assets are capitalized. Repairs and maintenance expenses are expensed as incurred.

b) Tangible Fixed Assets

Tangible fixed assets are recorded at their acquisition cost, which consists of purchase price, freight, customs duties and other related costs. Interest on loans and borrowings are not considered to be part of these costs.

Tangible fixed assets belonging to the category of tangible assets and sets of tangible assets – machinery, appliances, equipment, vehicles and fixtures and fittings related to the licensed activities of a company distributing electricity with a cost exceeding CZK 5 thousand are depreciated over their useful economic lives. Transformer station technologies, transformers of the distribution company and power meters are deemed the tangible fixed assets regardless of their valuation.

Easements on land and building, excluding the right to use and enjoy, are also deemed the tangible fixed assets regardless of their valuation, unless they are reported as part of the building valuation.

Internally-developed tangible fixed assets are recorded at their accumulated cost, which consists of direct material, labor costs and production overheads.

Tangible fixed assets acquired free of charge are valued at their replacement cost and are recorded with a corresponding credit to the 'Other capital funds account' on the date of acquisition. The costs of technical improvements of tangible fixed assets are capitalized. Repairs and maintenance expenses are expensed as incurred.

Depreciation

Depreciation is calculated based on the acquisition cost and the estimated useful life of the related asset. The useful economic lives are as follows:

	Years
Structures	10-50
Machinery and equipment	4-30
Vehicles	5-10
Furniture and fixtures	5-30
Miscellaneous tangible fixed assets	6-30

Acquisition costs and net book values of depreciated intangible and tangible fixed assets were revalued in an expert opinion as at 1 January 2010. The revaluation of acquisition costs and net book value of assets was made in connection with the merger project (see Note 1).

c) Cash

Cash includes liquid valuables, cash in hand and at bank.

Within the ČEZ Group, a system for utilization of idle money of individual group companies, i.e. cash pool, has been introduced. Cash deposited in or used from this system as at the date of the financial statements is reported in 'Short-term receivables from group companies with majority control' or 'Current liabilities to group companies with majority control', as appropriate, in the accompanying balance sheet and the change in the deposited cash is reported in 'Change in receivables/payables from group cash pool' in the accompanying cash flow statement.

d) Inventory

Purchased inventory is stated at actual cost being determined using the weighted average method. Costs of purchased inventory include acquisition-related costs (freight, customs, commission, etc.).

Finished goods and work-in-progress (services) are recorded at actual cost. Actual cost includes, in particular, direct costs of material, manufacturing costs of relaying and cost of inventory produced internally. The cost of inventory produced internally includes direct labor costs, including overhead costs, and are allocated to work-in-progress on the basis of hours actually worked.

e) Receivables

Receivables are initially measured at their nominal amount. Purchased receivables are measured at cost. Both long- and short-term receivables are carried at their realizable value after allowance for doubtful accounts. Additions to the allowance account are charged to income.

f) Equity

The basic capital of the Company is stated at the amount recorded in the Commercial Register maintained in the Registry Court. Any increase or decrease in the basic capital made pursuant to the decision of the General Meeting which was not entered in the Commercial Register as at the balance sheet date is recorded through changes in basic capital. Contributions in excess of basic capital are recorded as share premium. Other capital funds consist of monetary and non-monetary contributions in excess of basic capital, such as tangible assets donations, etc.

In accordance with the Articles of Association, the Company creates a reserve from profit.

The Company establishes a reserve fund from profit after tax disclosed in the annual financial statements in the year, in which profit is generated for the first time; the reserve fund is allocated a minimum of 20% of profit after tax, however not more than 10% of basic capital.

The reserve fund is allocated 5% of profit after tax for each particular year until the fund reaches 20% of basic capital of the Company. The fund can only be used to offset losses. The amounts used from the fund are replenished in the same manner as the reserve fund has been established.

g) Provisions and Liabilities

The Company creates legal provisions in accordance with the Act on Provisions and provisions for losses and risks if the related purpose amount and timing can be reliably estimated and the accrual and matching principles are observed.

Long-term liabilities and current liabilities are carried at their nominal values.

Long-term liabilities and current liabilities to credit institutions are recorded at their nominal values. Any portion of long-term debt which is due within one year of the balance sheet date is classified as short-term debt.

Liabilities or contingent liabilities that are not recorded in the balance sheet because significant uncertainties exist with respect to the amount, title or timing of the expected outflow of benefits are described in Note 15.

h) Leases

The Company records leased assets by expensing the lease payments and, for finance leases, capitalizing the residual value of the leased assets when the lease contract expires and the purchase option is exercised.

i) Foreign Currency Transactions

Assets and liabilities whose acquisition or production costs were denominated in foreign currencies are translated into Czech crowns at the exchange rate existing at the transaction date. On the balance sheet date monetary items are adjusted to the exchange rates published by the Czech National Bank at 31 December.

Realized and unrealized exchange rate gains and losses were charged or credited, as appropriate, to finance income for the year.

j) Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the balance sheet date and the reported amounts of revenues and expenses during the reporting period. The Company management prepared these estimates and predictions based on all available relevant information. These estimates and assumptions are based on information available as at the date of the financial statements and may differ from actual results.

k) Recognition of Revenues and Expenses

Revenues and expenses are recognized on an accrual basis, that is, they are recognized in the periods in which the actual flow of the related goods or services occurs, regardless of when the related monetary flow arises.

Long-term contracts are accounted for according to the completed contract method as specified in the contract.

The Company recognizes as an expense any additions to provisions for or allowances against risks, losses or physical damage that are known as at the financial statements' date.

Revenues from distribution services are recorded at the time of the distributed electricity delivery. Total revenues from provided services comprise the billing and changes in unbilled distribution services. The Company records these revenues as revenues from sale of finished products and services. Costs of electricity distribution and the power grid operation are recorded as service consumption (mainly system and transmission services) and consumption of material and energy.

Changes in unbilled distribution services are set monthly on the basis of estimation. The estimation of monthly change of unbilled distribution services comes from deliveries of electricity in the given month after deduction of actual billing and estimation of distribution network losses. The total estimation is verified by calculation which is based on the load simulation at each point of delivery on the basis of temperature-adjusted load profiles. The actual billed distribution service amounts may differ from the estimation.

l) Income Tax

The corporate income tax expense is calculated based on the statutory tax rate and book income before taxes, increased or decreased by the appropriate permanent and temporary differences (e.g. non-deductible provisions and allowances, entertainment expenses, differences between book and tax depreciation, etc.). In addition, the following items are taken into consideration: tax base decreasing items (donations), tax deductible items and income tax reliefs.

The Company records an outstanding income tax liability, net of paid tax prepayments, in provisions. If income tax prepayments exceed the estimate of current income tax expense as at the balance sheet date, the difference will be recorded as a short-term receivable.

The deferred tax position reflects the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for corporate income tax purposes, taking into consideration the period of realization.

Deferred tax asset is recognized when it becomes probable that the asset will be realized in the future.

m) Subsequent Events

The impact of events that occurred between the balance sheet date and the date of the financial statements preparation is recognized in the financial statements provided these events provide additional evidence about conditions that existed at the date of the balance sheet.

If material events reflecting the facts occurring after the balance sheet date happened between the balance sheet date and the date of the financial statements preparation the consequences of these events are disclosed in the notes to the financial statements but not recognized in the financial statements.

4. Fixed Assets

a) Intangible Fixed Assets (in CZK thousands)

COST

	At beginning of year	Additions	Disposals	Transfers	At end of year

The total value of tangible assets which are not reflected in the accompanying balance sheet was CZK 33,033 thousand and CZK 33,727 thousand at acquisition cost as at 31 December 2022 and 2021, respectively.

5. Inventory

Excess, obsolete and slow moving inventory has been written down to its estimated net realizable value by an allowance account (see Note 7).

6. Receivables

Allowances against outstanding receivables that are considered doubtful were charged to income based on collectability and ageing analysis of receivables (see Note 7).

As at 31 December 2022 and 2021, receivables overdue for more than 30 days totaled CZK 1,539,932 thousand and CZK 1,620,127 thousand, respectively. As at 31 December 2022 and 2021, receivables of CZK 62,992 thousand and CZK 182,233 thousand, respectively are subject to the claim process concerning the POZE legal dispute (see Note 15) and receivables of CZK 796,121 thousand and CZK 778,537 thousand, respectively, are subject to claim procedures for system services.

As at 31 December 2022 and 2021, receivables overdue for more than 5 years totaled CZK 861,095 thousand and CZK 713,641 thousand, respectively.

The Company wrote off receivables of CZK 20,043 thousand and CZK 126,737 thousand in 2022 and 2021, respectively as they were irrecoverable or due to unsatisfying the claims in bankruptcy proceedings.

The Company is part of the cash-pooling structure administered by Komerční banka, a.s. on behalf of the ČEZ Group.

Cash in CZK transferred to the parent company ČEZ, a. s., within the cash pool mechanism bears an interest rate of PRIBOR O/N – 0.50% p.a.

Cash in CZK provided by the parent company within the cash pool mechanism bears an interest rate of PRIBOR O/N + 0.30% p.a. (payables).

A credit rate limitation (receivables) – if a one-day interest rate of PRIBOR O/N minus margin is less than or equal to zero, a minimum rate of 0.03% p.a. shall apply.

A debit rate limitation (payables) – if an interest rate of PRIBOR O/N is less than zero, the rate shall be zero.

Cash in EUR transferred to the parent company ČEZ, a. s. within the cash pool mechanism bears an interest rate as per the respective KB Notification on interest rates in a foreign currency, currently 0.00% p.a. (receivables).

Cash in EUR provided by the parent company within the cash pool mechanism bears an interest rate of EUR €STR O/N. Starting 31 October 2022, the cash bears an interest rate of €STR O/N + 1.55% p.a. (payables).

A debit rate limitation (payables) – if an interest rate of €STR O/N is less than zero, the rate shall be zero.

In the course of the year, a debit rate (payables) changed on 4 May 2022 from an original rate of €STR O/N + 0.35% p.a. to €STR O/N + 0.45% p.a. and subsequently changed to the currently valid rate €STR O/N + 1.55% p.a. on 31 October 2022.

The balance of cash transferred to the parent company ČEZ, a. s., within the cash pool system was CZK 7,714,196 thousand and CZK 7,097,517 thousand as at 31 December 2022 and 2021, respectively.

As at 31 December 2022 and 2021, the Company had CZK 9,742 thousand and CZK 8,582 thousand, respectively of long-term receivables, net.

Receivables from related parties (see Note 19).

Short-term advances granted include operating advances paid.

Unbilled revenue represents, in particular, unbilled distribution services.

Changes in unbilled distribution services in 2022 and 2021 were as follows (in CZK thousands):

Unbilled distribution services	Total	Retail business customers	Retail household customers
Ending balance as at 31/12/2020	12,011,365	2,856,185	9,155,180
Changes in 2021	(1,535,777)	(750,112)	(785,665)
Ending balance as at 31/12/2021	10,475,588	2,106,073	8,369,515
Changes in 2022	(387,271)	29,960	(417,231)
Ending balance as at 31/12/2022	10,088,317	2,136,033	7,952,284

7. Allowances

Allowances reflect a temporary diminution in the value of assets.

Changes in the allowance accounts (in CZK thousands):

Allowances against:	Balance as at 31/12/2020	Additions	Deductions	Balance as at 31/12/2021	Additions	Deductions	Balance as at 31/12/2022
Inventory	71	-	(71)	-	-	-	-
Receivables	840,031	150,074	(286,203)	703,902	113,643	(97,442)	720,103
of which: legal	739,727	72,060	(163,182)	648,605	54,070	(35,804)	666,871
accounting	100,304	78,014	(123,021)	55,297	59,573	(61,638)	53,232

Legal allowances are created in compliance with the Act on Provisions and are tax deductible.

8. Prepaid Expenses and Accrued Income

As at 31 December 2022 and 2021, prepaid expenses include in particular accrued fees for arranging loans of CZK 23,953 thousand and CZK 27,797 thousand, respectively.

Expenses are charged to income for the year in which they were incurred.

9. Equity

The basic capital of the Company consists of 600 registered shares in a certificate form with a nominal value of CZK 100,000,000 per share. The shares are transferable only with the consent of the Board of Directors which is based on a prior approval by the Supervisory Board. All shares are fully subscribed and paid.

Subject to the decision of the sole shareholder executing the powers of the general meetings of the Company held on 15 June 2022 and 23 June 2021, the following profit distribution for 2021 and 2020 was approved (in CZK thousands):

Profit for 2020	6,926,577	Profit for 2021	6,626,507
Transfer to retained earnings	2,843,577	Transfer to retained earnings	2,691,507
Dividend paid out of 2020 profit	4,083,000	Dividend paid out of 2021 profit	3,935,000
Retained earnings as at 1/1/2021	10,619,892	Retained earnings as at 1/1/2022	13,463,469
Retained earnings as at 31/12/2021	13,463,469	Retained earnings as at 31/12/2022	16,154,976

Distribution of profit for 2022 was not decided by the financial statements date.

10. Provisions

The movements in the provision accounts were as follows (in CZK thousands):

Provisions	Balance as at 31/12/2020	Additions	Deductions	Balance as at 31/12/2021	Additions	Deductions	Balance as at 31/12/2022
Provision for corporate income tax	-	-	-	-	-	-	-
Other provisions	1,592,550	441,004	(66,141)	1,967,413	75,061	(76,084)	1,966,390

As at 31 December 2022 and 2021, the provision for corporate income tax was offset against paid prepayments totaling CZK 1,298,117 thousand and CZK 1,465,086 thousand, respectively. As at 31 December 2022 and 2021, the Company recognized a receivable of CZK 154,606 thousand and CZK 79,498 thousand, respectively, after offsetting with the advance payments. The receivable was recognized in the caption Due from government – tax receivables.

Other provisions were created, in particular, for retirement benefits and 50 years jubilee bonuses paid under collective agreement.

As at 31 December 2022, the Company released a provision for restructuring in the amount of CZK 23,838 thousand.

As at 31 December 2022 and 2021, the Company had a provision for pending litigation in the amount of CZK 42,779 thousand and CZK 42,779 thousand, respectively.

11. Long-term Liabilities

As at 31 December 2022 and 2021, the Company had the following significant long-term liabilities (in CZK thousands):

	Due by	31/12/2022	31/12/2021
4th credit line	31/12/2025	1,540,000	2,100,000
5th credit line	25/9/2028	17,000,000	17,000,000
6th credit line	31/5/2030	6,514,200	7,382,760
7th credit line	31/5/2032	4,492,700	
Total		29,546,900	26,482,760
Current portion		2,443,160	1,428,560
Long-term portion		27,103,740	25,054,200

A contract for 4th credit line was signed by and between ČEZ Distribuce, a. s., (debtor) and ČEZ, a. s., (creditor) on 2 March 2015. The first half of the loan was withdrawn on 11 March 2015, the other one on 21 August 2015. The loan is repayable by 31 December 2025. The interest rate has been set at 2.4% p.a. The loan under the 4th credit line was provided to finance the implementation of the Project of reconstruction and development of the power grid in the Czech Republic (the "Project").

A contract for 5th credit line was signed by and between ČEZ Distribuce, a. s., (debtor) and ČEZ, a. s., (creditor) on 25 September 2018. The credit line as per the contract is CZK 30,000,000 thousand. The first withdrawal in the amount of CZK 17,000,000 thousand was made on 29 November 2018. The interest rate has been set at 3.0% p.a.

A contract for 6th credit line was signed by and between ČEZ Distribuce, a. s., (debtor) and ČEZ, a. s., (creditor) on 10 August 2020, the loan was withdrawn on 18 August 2020. The loan is repayable by 31 May 2030. The interest rate has been set at 2.6% p.a. The loan was provided to finance the Project of strengthening and development of the power grid (the "Project").

A contract for 7th credit line was signed by and between ČEZ Distribuce, a. s., (debtor) and ČEZ, a. s., (creditor) on 30 March 2022; the first portion of the loan was withdrawn on 27 July 2022 in the amount of CZK 5,000 million. The loan is repayable by 31 May 2032. The interest rate has been set at 5.01% p.a. The loan was provided to finance the implementation of the Project of investments in strengthening and development of the power grid (the "Project").

The contracts for 4th, 6th and 7th credit lines with ČEZ, a. s., includes the following terms and conditions to be fulfilled by the Company:

1. Maintenance	To maintain, repair and refurbish real estate that is part of the Project
2. Assets	To maintain legal title to and possession of the assets that are part of the Project
3. Insurance	To insure all work and real estate that is part of the Project
4. Servitude and beneficial use	To maintain the rights to use and enjoy necessary for the Project operation
5. Environment	To implement the Project in compliance with the environment protection legislation

The Company was in compliance with these terms and conditions as at 31 December 2022 and 2021.

The interest expense relating to the loans for 2022 and 2021 was CZK 854,775 thousand and CZK 783,644 thousand, respectively.

The aggregate maturities of loans as at 31 December 2022 are as follows (in CZK thousands):

	Loans
2023	2,443,160
2024	2,443,160
2025	2,303,160
2026	1,883,160
2027	1,302,860
2028 and thereafter	19,171,400
Total	29,546,900

In addition, the Company undertook to pay interest and principal according to the payment schedule, inform the creditor of significant overdue payables and not to change the Company's ownership structure.

12. Current Liabilities

As at 31 December 2022 and 2021, the Company had current liabilities overdue for more than 30 days totaling CZK 1,640 thousand and CZK 7,656 thousand, respectively. As at 31 December 2022 and 2021, the Company had liabilities overdue for more than 5 years totaling CZK 0 and CZK 6,187 thousand, respectively.

As at 31 December 2022 and 2021, the Company had liabilities of CZK 112,499 thousand and CZK 112,334 thousand owing to social security and health insurance premiums due in January 2023 and January 2022, respectively.

As at 31 December 2022 and 2021, short-term advance payments received of CZK 11,436,293 thousand and CZK 10,675,996 thousand, respectively cover, in particular, unbilled distribution services.

Unbilled deliveries represent, in particular, unbilled services related to electricity distribution, unbilled deliveries of electricity purchased to cover power grid losses and unpaid vacation claims for 2022 and 2021.

Payables to related parties (see Note 19).

13. Accruals and Deferred Income

Deferred income includes, in particular, contributions for reasonable costs incurred for connection and assuring the required power input and in case of switching installations diversion to separate constructions related to them. It is recognized into income for the year in which it was earned. These are in particular connection fees within the meaning of Act No. 458/2000 Coll. (the Energy Act) and Decree No. 16/2016 Coll. of Energy Regulatory Office. These fees are credited to income by the Company in compliance with its internal regulations in the amount of 1/20 of collected fees per annum.

In 2022 and 2021, the movements in deferred income balance (in CZK thousands) comprising, in particular, contributions for reasonable costs incurred for connection and assuring the required power input and in case of switching installations diversion to separate constructions related to them were as follows:

Balance as at 31/12/2020	8,649,846
Additions in 2021	1,754,166
Released to revenues in 2021	(844,720)
Balance as at 31/12/2021	9,559,292
Additions in 2022	1,986,035
Released to revenues in 2022	(906,733)
Balance as at 31/12/2022	10,638,594

14. Income Taxes

On the basis of preliminary calculation the Company calculated tax expense as follows (in CZK thousands):

	2022	2021
Profit before taxes	7,861,118	8,204,024
Difference between book and tax depreciation	(1,344,160)	(1,052,216)
Difference between net book value of fixed assets for accounting and tax purposes	80,446	90,429
Non-deductible expenses		
Creation of provisions	(1,022)	374,863
Creation/release of allowances	(2,065)	(67,384)
Other	241,707	165,166
Taxable income	6,836,024	7,714,882
Current income tax rate	19%	19%
Tax	1,298,845	1,465,828
Tax reliefs	(728)	(741)
Provision for corporate income tax	1,298,117	1,465,087
Adjustment of the tax paid in previous years	(1,487)	(9,247)
Current tax expense	1,296,630	1,455,840

The Company submits regular tax return prior to 30 June 2023.

The Company quantified deferred taxes as follows (in CZK thousands):

Deferred tax items	31/12/2022		31/12/2021	
	Deferred tax asset	Deferred tax liability	Deferred tax asset	Deferred tax liability
Difference between net book value of fixed assets for accounting and tax purposes	-	(12,474,657)	-	(12,234,864)
Other temporary differences:				
Allowances against receivables	10,006	-	10,331	-
Provisions	365,486	-	365,680	-
Other	90,706	(21,353)	51,580	(1,661)
Total	466,198	(12,496,010)	427,591	(12,236,525)
Net		(12,029,812)		(11,808,934)

Change in deferred tax recognized in the income statement for 2022 and 2021 was CZK 220,878 thousand and CZK 121,677 thousand, respectively.

15. Commitments and Contingencies

The Company has effected the following types of insurance:

- Insurance of buildings, constructions and selected movable items (transformer stations, administrative buildings);
- Insurance of civil engineering structures (very high voltage and high voltage overhead power grids).

Other types of insurance include general liability insurance, insurance for damage caused by defective products and liability insurance of management and board members.

As at 31 December 2022 and 2021, the Company had concluded contracts for future supplies of fixed assets in the amount of approx. CZK 10,063,890 thousand and CZK 9,907,621 thousand, respectively. As at 31 December 2022 and 2021, an amount of contractual liabilities for the following years comprises a contractual fee totaling CZK 9,801,963 thousand and CZK 9,582,100 thousand, respectively for investments, CZK 255,495 thousand and CZK 321,657 thousand, respectively for repairs and CZK 6,432 thousand and CZK 3,864 thousand, respectively for relaying.

The Company is a party to a number of legal disputes relating to collection of a price component pertaining to costs incurred in supporting the electricity generation from renewable energy sources and combined heat and power generation (fees for "POZE – supported energy sources") in 2013. The Company's management believes that if an adverse judgment against ČEZ Distribuce, a. s. is delivered in these cases and any potential similar disputes, the Company will be entitled to claim back the fees from OTE, a.s. Therefore, the Company takes all measures necessary to prevent the Company from an unfavorable impact in the case of failure, if any.

Regarding legal disputes for POZE 1 – 3 Q 2013, there is a Supreme Court judgment from the second half of 2019 and some other judgments from 2020, in which the Court approves, in its judgment regarding similar case with different participants, the procedure applied by the Company in the respective period, i.e. that the fees should be collected also for the so-called own consumption. Also, in legal disputes for POZE 4 Q 2013 there is a final decision of the Energy Regulator regarding one of the Company disputes from the beginning of 2020 that confirms that the fees for POZE should have been collected at an amount collected by the Company.

In addition, the Company is a party to several disputes related to connection of photovoltaic power plants to the power grid. Based on the analysis performed, the Company's management believes that the risk of losing these disputes is very small and it is unlikely the Company would be imposed any significant obligations in the future arising from these disputes.

Eight companies claim against ČEZ Distribuce, a. s. billing of a part of system services since 2016, which the Company repays to ČEPS, a.s. The receivables subject to claim procedures are listed in Note 6. Again, Company's management believes that if the receivables are not collected in these cases and any potential similar claims or disputes, the Company will be entitled to claim back the fees from ČEPS, a.s. Therefore, the Company takes all measures necessary to prevent the Company from an unfavorable impact of the claim process in the case of failure, if any.

16. Leases

The Company leases certain assets from categories such as Buildings, halls and constructions and also Separate movable items and Land.

As at 31 December 2022 and 2021, assets which are being used by the Company under lease arrangements consist of the following (in CZK thousands):

Leased item	Lease term in months	Expense in 2022	Expense in 2021
Buildings, halls and constructions	18–240	193,717	188,632
Machinery and equipment	18–240	29,959	34,961
Hardware	48–72	3,604	3,634
Vehicles	48–72	13,548	13,429
Land	18–240	4,412	4,086
Total		245,240	244,742

A majority of lease agreements has been concluded for an indefinite period. The lease term in months is the usual period for which the Company intends to use the leased assets at the time the contract is signed.

17. Revenues and Expenses

The breakdown of revenues on ordinary activities is as follows (in CZK thousands):

	2022	2021
Use of grids, incl. reserved capacity at low voltage level	23,420,938	22,448,895
Support of electricity from renewable sources	8,266,212	13,582,250
Provided reserved capacity at very high voltage and very low voltage levels	9,337,229	9,649,214
Provision of system services	4,256,738	3,716,485
OTE charges	190,514	176,193
Other energy services	210,588	185,958
Other non-energy services	252,228	230,750
Total revenues	45,934,447	49,989,745

A vast majority of the Company's revenues comprises primarily revenues from the provision of distribution network services to customers and electricity producers and traders. The prices for services related to providing of distribution network are subject to price regulations of the Energy Regulatory Office and were determined by the Energy Regulatory Office's price decision.

As at 31 December 2022 and 2021, of the total revenues foreign revenues were CZK 26,158 thousand and CZK 15,049 thousand from Axpo Solutions AG, organizační složka (branch), having its registered office in Prague 1, Klimentská 1216/46, whose founder is Axpo Solutions AG, having its registered office in Switzerland (business reg. no.: 24683515, VAT ID CHE105779348MWST, Parkstrasse 23, Baden 5401), which has a license for electricity trading. The revenues were generated from services related to provision of distribution network.

In 2022 and 2021, the Company recorded in revenues a settlement of subsidy for operating needs totaling CZK 3,235 thousand and CZK 4,932 thousand, respectively.

The costs incurred by the Company in 2022 and 2021, respectively include, in particular, costs of purchase of transmission and distribution services, including electricity purchased to cover power grid losses (CZK 21,698,323 thousand and CZK 25,330,060 thousand), which are subject to price regulation of the Energy Regulatory Office, costs of purchase of other energies, materials and services related to the operation and maintenance of the power grid (CZK 4,483,482 thousand and CZK 4,448,028 thousand), personnel expenses (CZK 5,234,281 thousand and CZK 4,612,696 thousand) and capitalization of accumulated cost [CZK (1,302,102) thousand and CZK (1,213,357) thousand].

During 2022 a price change decision, changing the price for "POZE" (supported energy sources) fees to zero, was issued; as a result, this had a significant impact on expenses and revenues with no effect on the Company's profit or loss.

Statutory auditor's fees are disclosed in the consolidated financial statements of ČEZ, a. s.

18. Personnel and Related Expenses

The breakdown of personnel expenses is as follows (in CZK thousands):

	2022		2021	
	Total (incl. statutory bodies)	Members of management, supervisory and administrative bodies	Total (incl. statutory bodies)	Members of management, supervisory and administrative bodies
Average number of employees*	4,597	11	4,655	10
Wages and salaries	3,616,740	30,398	3,197,826	20,942
Social security and health insurance	1,230,838	5,267	1,092,041	6,525
Social cost	386,703	2,207	322,829	2,055
Total personnel expenses	5,234,281	37,872	4,612,696	29,522

* Average recorded number of employees recalculated in physical persons as per the length of their working time to full working time set by the employer.

The members of statutory bodies received total bonuses and other remuneration of CZK 792 thousand and CZK 792 thousand in 2022 and 2021, respectively.

Members of statutory bodies have benefits consisting of using the automobiles for private purposes, contributions to life insurance and bonuses. Members of management have benefits consisting of using the automobiles for private purposes.

19. Related Party Information

The members of management, supervisory and administrative bodies were granted no advances, earnest money, loans, borrowings, guarantees or other benefits (except using the automobiles and telephones for private purposes) in 2022 and 2021 and they do not hold any shares of the Company.

Related parties specified in the tables below are companies of the ČEZ Group.

As at 31 December 2022 and 2021, receivables from group companies with majority control in the amount of CZK 7,714,196 thousand and CZK 7,097,517 thousand, respectively represent the balance of cash in the cash pooling system (see Note 6).

The Company has loans granted by the parent company (see Note 11).

The Company provides services to related parties.
